WEN MODEL'S 321 First Co.

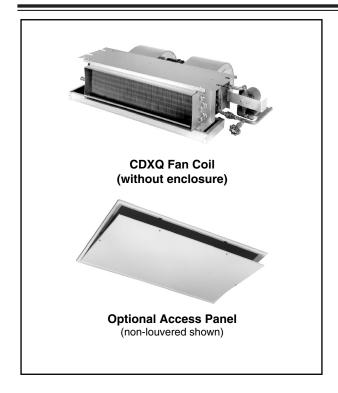

CDXQ(-C) Series

MEAL NEW OPTION:

- REPON:

ANELS Horizontal Recessed Ceiling Fan Coil

1-1/2 - 3 Tons Cooling Up to 49,300 BTUH HW Heat

The space-saving CDXQ series fan coil is only 10" high (11" with enclosure), thus allowing it to recess in a ceiling. Recessed ceiling fan coils save valuable floor space and eliminate costly "equipment" closets.

The CDXQ fan coil has a factory installed circulating pump with easy access hot water check valve. Piping the CDXQ fan coil to a properly sized gas-fired water heater provides space heating. Contact the factory for assistance with sizing.

(1) First Co's customer is ultimately responsible for confirming which fan coil models are compatible with selected outdoor unit(s) and which expansion valves are required. To determine certified indoor/outdoor matches, go to www.firstco.com or contact the factory.

All CDXQ fan coils include a 120/24V transformer and are completely prewired. A sloped drain pan allows positive drainage of condensate.

(-C) model: for CDXQ fan coils installed within an enclosure, add "-C" after CDXQ. For instance, ordering model 19CDXQ-C will include a CDXQ fan coil factory installed in a # 9ECDX01 enclosure and your choice of either a solid or louvered panel.

Note: State of MA, .248 CMR code of the state of MA requires a pump timer. (60 seconds every 6 hours) (Field Installed)

#### Standard Features:

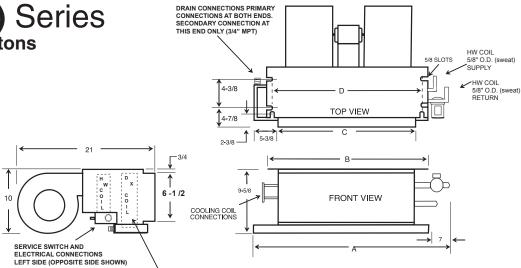

- Factory installed service switch
- Freeze protector on HW coil
- Two speed fan operation
- Single point power connection
- HW coil with installed pump, check valve, and air purge
- Drain pan has 3/4" NPT primary and secondary (overflow) fittings
- 120V motor, 24V controls
- Highly efficient copper tube/aluminum fin heating and cooling coils. Cooling coil has a piston-type metering device or factory or field installed R410A TXV's (non-bleed type). Contact factory for correct match with outdoor unit.
- Insulated and coated galvanized steel drain pan is sloped for proper drainage
- Effective January 2016, Cabinet air leakage is no more than 2% when tested in accordance with ASHRAE 193.

#### **Optional Accessories:**

- Attractive off-white return air / access panel with captive screws (panels can be field painted)
- IAQ filter panels (see P. 3)
- Fully insulated enclosure with matching ceiling panel (enclosure can be pre-installed). Also allows for ducted
- Factory or field installed TXV's (non-bleed type)
- Condensate overflow switch (field installed) (# SS3)
- Pump timer (# 941-2) (see P. 3)

- (1) Units should not be applied to a system with less than 350 CFM/Ton airflow.
- (2) Motors are 120V and operate on high speed for cool and low speed for heating.
- (3) CFM vs. static at motor cooling speed.
- (4) Add .05 static when enclosure and/or ceiling panel are used.
- (5) 31, 32 and 37CDXQ have two motors and four blowers.

## NOTES:

- 1. Heat BTUH is at 70 degree EAT.
- 2. 120 degree and 180 degree data is supplied for boiler applications.
- 3. Heating BTUH output will not exceed output of water heater.
- 4. Approved for installation with 0" clearance to combustible material.

## All TXV's are approved for cooling only or heat pump operation (non-bleed type).

Expansion valve requirement depends on the selected outdoor unit. Go to: www.firstco.com or contact the factory for assistance.
