Warranty⁴

- Standard Limited Warranty: Parts Five (5) Years, Compressor Seven (7) Years
- Warranty Extension: The Standard Limited Warranty covering parts and the compressor will
- be extended to a period of ten (10) years under specific conditions and online registration is required.

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR® criteria. Ask your contractor for details or visit EnergyStar.gov. ²Savings may vary based on model selected, hours of operation and geographical location. Example given based on 33-SEER system versus 14-SEER system. ³Available on select Achiever® models. ⁴For complete details of the limited and conditional warranties, including applicable terms and conditions, contact your local contractor or go to Ruud.com for a copy of the product warranty certificate. Conditional warranties must be registered through RegisterMyUnit.com.

Ductless Mini-Split Heat Pump Systems

RUUD HAS COMFORT COVERED

Ruud[®] Ductless Mini-Split Heat Pump Systems provide both heating and cooling for year-round comfort. Their efficiency, versatility and simplicity make them an ideal choice for keeping rooms and other spaces comfortable.

Ruud.com

RUUD ACHIEVER® SERIES DUCTLESS MINI-SPLIT SYSTEMS

Single-Zone Efficiencies up to: 24 SEER / 14.5 EER / 13 HSPF

Ductless Technology

Ruud Ductless Mini-Splits are a convenient alternative in areas of the home where traditional ducted systems may not be an option. Setup and installation are quick and easy and won't take up closet or attic space.

Year-Round Savings & Efficiency

They provide both heating and cooling for your home year-round. The high energy efficiencies of ductless mini-split systems slash utility bills by up to 24%².

Customized Comfort

With ductless mini-splits, you can heat or cool a room or other space independently of other rooms. So if one family member likes it hot while everyone else likes it a little cooler, he or she has total control.

Ø RELY ON RUUD.™ Ø

Get Comfortable—Wherever and Whenever

Efficiency

Energy Savings

Ductless mini-split systems save energy by drawing heat from the air outside and using it to heat your home. During summer, the process is reversed to cool your home. The result is efficiency that rivals traditional ducted systems and delivers up to 24%² utility bill savings.

Inverter Technology

Ruud[®] Ductless Mini-Split Systems deliver constant comfort using inverter technology. Inverter technology is like cruise control for your heating or cooling system. Compressors only run as fast as they need to maintain the comfort setting you choose.

High Performance Heating³

Even when it's bitterly cold outside, you're comfortable inside. Standard systems continue to deliver warm, comfortable air down to -5°F outside temp.

Individual Zoning

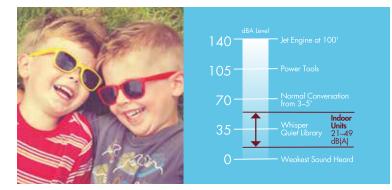

Ductless Mini-Split Heat Pump Systems are some of today's most advanced forms of heating and cooling.

Each Indoor Unit Can:

- Operate independently via remote control
- Supply both heating and cooling
- Provide high energy efficiencies
- Operate quietly
- Offer rebates

Quiet Operation

Ruud ductless systems are so quiet, you won't even know they're on. You can sleep well at night in a comfortable, peaceful environment. Ruud Achiever® Series wall mount units feature Quiet Mode—an extra-quiet fan speed to ensure you are not disturbed.

Versatility

Ductless mini-split systems work where traditional systems might not be an option:

- Older homes where ducting isn't possible
- Garages, workshops, sheds, additions and attics
- Rooms not covered by or under-served by a ducted system

Ductless systems are also an efficient heating and cooling solution for electrically heated homes. They are easy to operate, quiet and provide substantial savings.

Indoor Unit Options

Wall Mounted

• Mounts high on a wall, out of sight and does not require ductwork, increasing energy efficiency

Ploor Mounted

• Ideal for residential radiator replacements or any room with limited upper wall space, like a kitchen or sunroom

Slim Duct

• Mounted in a ceiling or in a framed enclosure below a ceiling, slim duct units are concealed and out of sight

Compact Cassette

• Extremely discreet, with only the grille showing in the ceiling, cassettes use the latest powerful turbo fan technology to distribute the conditioned air evenly
