UNIVERSAL A2L REFRIGERANT DETECTION SYSTEMS (RDS)

IDEAL FOR USE WITH BOTH CASED AND UNCASSED COILS, PLUS ALL AIR HANDLERS!

Standard Mitigation Refrigerant Detection System (RDS) Kit

OPTION S

Standard Mitigation Control Kit (S) – turns on indoor blower to dissipate refrigerant concentration and cuts power to outdoor unit to stop new refrigerant from entering the space. Kit includes all components needed for RDS installation.

INCLUDED WITH KIT:

- ▶ (1) Installation Instructions
- ▶ (1) Wiring Diagram Schematic
- ▶ (1) Mitigation Control Assembly
- ▶ (1) Strain Relief Clip
- ▶ (2) Cable ties
- ▶ (2) #8 x ½ Drill Point Screws
- ▶ 3' Power & Low Voltage Connection
- ▶ Sensor Connections
 - (1) 8' Sensor Cable
 - (1) Sensor + Bracket
- ▶ Stickers & Labels

Standard + Accessory Control Refrigerant Detection System (RDS) Kit

OPTION R

Mitigation + Accessory Control Kit (R) – includes the same functionality as standard option plus ability to energize/de-energize up to four inputs for accessories such as electric heat, gas furnace, air cleaners, and zoning systems.

INCLUDED WITH KIT:

- ▶ (1) Installation Instructions
- ▶ (1) Wiring Diagram Schematic
- ▶ (1) Mitigation Control Assembly
- ▶ (1) Additional Accessory Control Connection
- ▶ (1) Strain Relief Clip
- ▶ (2) Cable ties
- ▶ (2) #8 x ½ Drill Point Screws
- ▶ 3' Power & Low Voltage Connection
- ▶ Sensor Connections
 - (1) 8' Sensor Cable
 - (1) Sensor + Bracket
- ▶ Stickers & Labels

WHERE HVAC INNOVATION MEETS DISTRIBUTION STRENGTH

From our first coil to our latest innovations, Aspen's commitment to our wholesale partners has never wavered — because your success is our legacy.

ABOUT ASPEN MANUFACTURING

Founded in 1975 and proudly headquartered in Humble, Texas, Aspen Manufacturing is one of North America's largest independent producers of evaporator coils and air handlers. As part of the RectorSeal family, Aspen delivers high-quality residential and light commercial products under the Aspen, Aspen Pro, and AirMark brands.

Designed, engineered, and assembled in the USA, Aspen products combine advanced fabrication, lean manufacturing, and rigorous quality control to ensure reliable performance, short lead times, and exact fit. With AHRI-certified systems, UL compliance, and ASTM-approved materials, Aspen sets the standard for durability and efficiency.

For nearly 50 years, Aspen has delivered unmatched flexibility and value to contractors, distributors, and homeowners alike. Learn more at www.aspenmfg.com and www.airmark-ac.com.

ABOUT RECTORSEAL

RectorSeal, LLC, a wholly owned subsidiary of CSW Industrials, Inc. [NYSE: CSW], is a leading provider of quality solutions for the professional trades serving heating, ventilation, and air conditioning (HVAC/R), plumbing, electrical, and construction markets. For more information about RectorSeal's innovative products and brands that increase efficiency and improve reliability, please visit www.RectorSeal.com.

ABOUT CSW INDUSTRIALS

CSW Industrials is a diversified industrial growth company with industry-leading operations in three segments: Contractor Solutions, Specialized Reliability Solutions, and Engineered Building Solutions. CSW provides niche, value-added products with two essential commonalities: performance and reliability. The primary end markets we serve with our well-known brands include HVAC/R, plumbing, electrical, general industrial, architecturally-specified building products, energy, mining, and rail transportation. For more information, please visit www.cswindustrials.com.

INDUSTRY LEADING QUALITY

QUALITY MANUFACTURING

Aspen utilizes state-of-the-art fabrication, assembly equipment, and stringent quality processes to maintain the highest possible quality in its products. The company adheres to its award-winning lean manufacturing system designed to eliminate inefficient procedures, policies, and production practices. Aspen is proud to share that the company offers customers the shortest possible lead times, delivering on our supply commitments. Incorporating ISO techniques, the company's quality management system (QMS) ensures product delivery that meets the highest industry standards. Aspen's leading-edge technology in product quality testing and assurance provides for products that meet or exceed industry standards for excellence.

QUALITY COMPLIANCE

Aspen units are AHRI Certifiable (210/240) with all major brands of HVAC equipment. In addition, Aspen products are compliant with UL 1995 4th edition safety requirements. All raw metal, plastic, and paint materials comply with the ASTM standards. Beyond technical compliance, Aspen can quickly adapt to changing market demands thanks to the company's nimble ability to react to changes in requirements and leadership's commitment to enabling a customer-centered company philosophy.

PRODUCT QUALITY

The company relies on rigorous quality control measures to ensure the delivery of energy-efficient products designed and built to the highest standards. Aspen provides its customers with thousands of product options, including OEM matching painted or embossed unpainted cabinets. When you choose Aspen, you get coils with an exact furnace fit explicitly manufactured to customer specifications. Even though Aspen is one of the largest independent coil manufacturers, the company readily provides custom-fit flexibility as part of its customer-centric philosophy.

QUALITY ASSURANCE

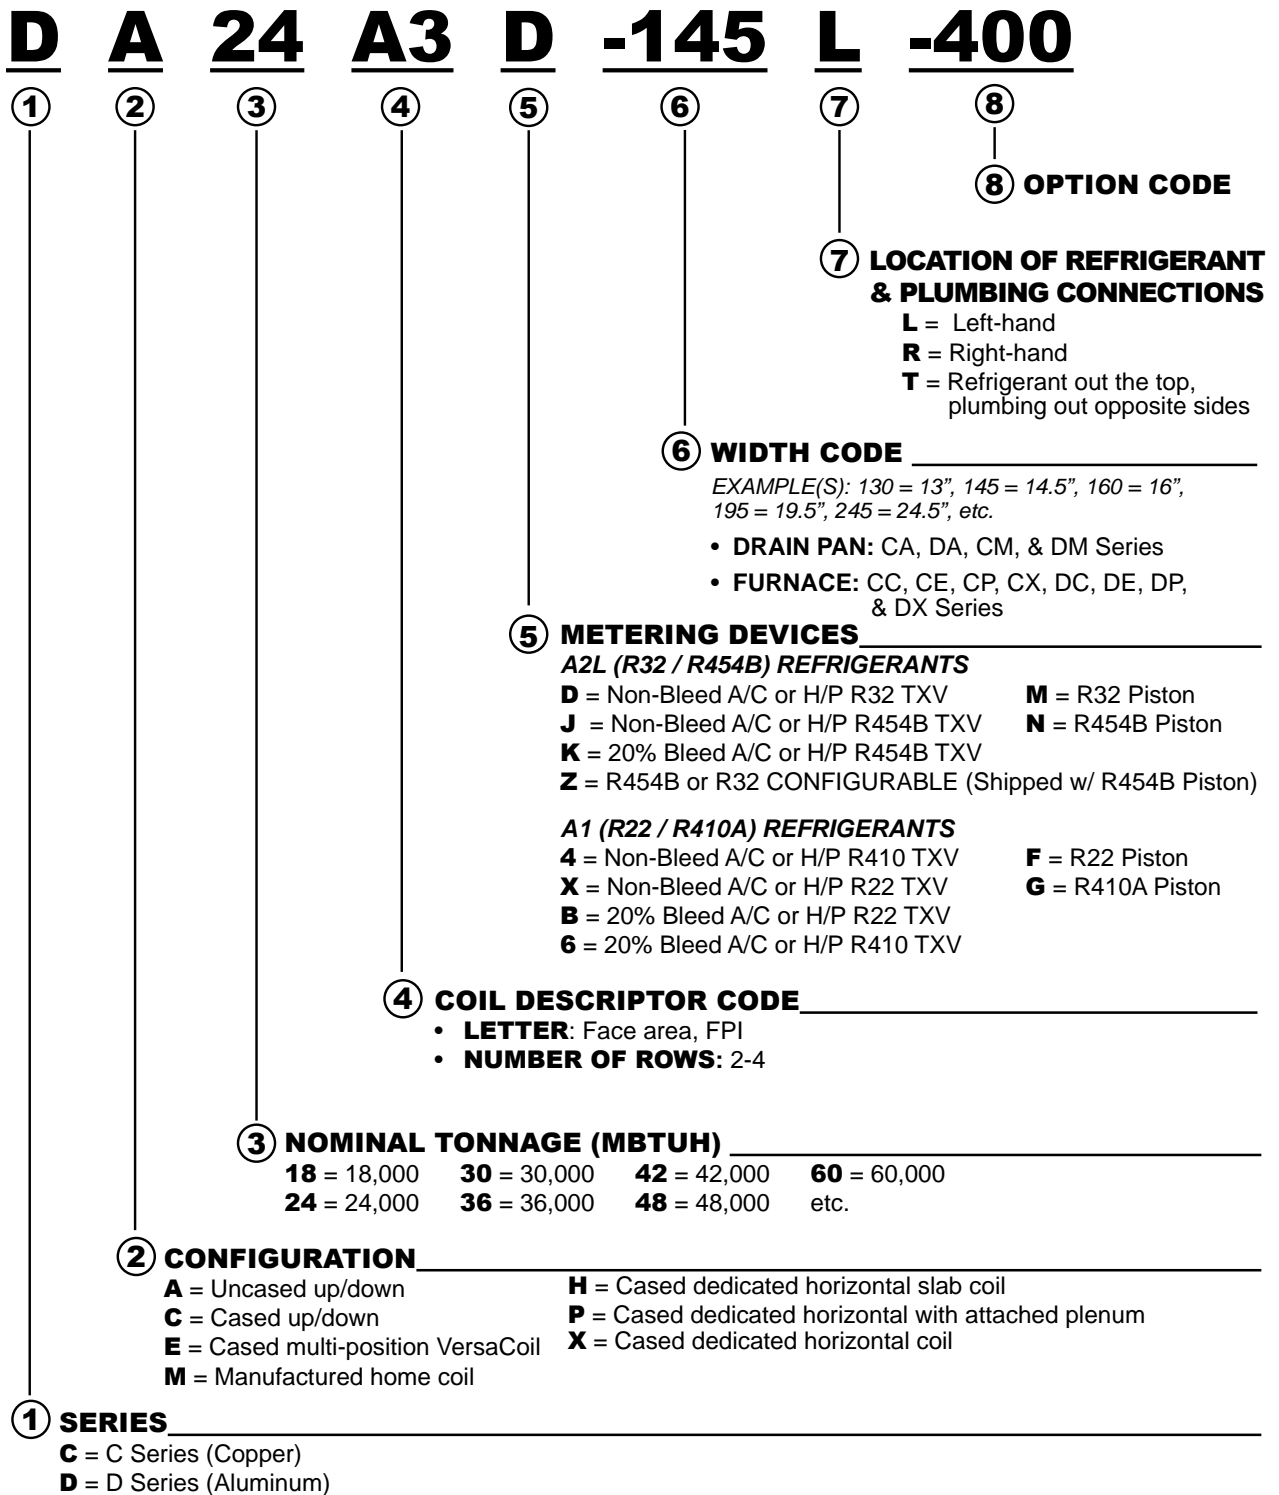

Aspen Customers Benefit From:

- **100% Coil Pressure Testing** – Every coil is pressure tested for proven reliability.
- **100% Run-Testing** – All air handlers are run-tested at the factory for quality assurance.
- **Exclusive Schrader Valve** – DX and hydronic heating coils include an industry-exclusive liquid line Schrader valve for quick "hiss testing."
- **Factory Holding Charge** – Select units ship with up to a 60 psi dry holding charge for easier installation.
- **Residential Warranty Coverage** – 10-Year hassle-free Limited Warranty on C and D series coils, plus Aspen multi-position and wall-mount air handlers (with registration).
- **Commercial & Manufactured Housing Warranty** – 5-Year Parts Limited Warranty covers Light Commercial and Manufactured Housing units.

CA SERIES

▶ COPPER
▶ UNCASSED

*Representative image only.
Some models may vary in appearance.*

STANDARD FEATURES

- Rified copper tubing, enhanced aluminum fins.
- Standard Upflow without field modification. Downflow applications require field kit, sold separately.
- Immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability.
- Schrader valve provided for pressure assurance testing.
- Left/right-hand standard refrigerant and plumbing connections:
 - Liquid line: 3/8" ODS
 - **Suction line:**
 - ▶ 3/4" ODS on 1-1/2-ton to 3-ton
 - ▶ 7/8" ODS on 3-1/2-ton to 5-ton
 - **Condensate Drains:** 3/4" NPT
- Heavy duty plastic or metal drain pans.
- ETL listed for R22, R410A, R454B, and R32 refrigerants.
- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance.
- AHRI certifiable with all brands of A/C and heat pump systems.

WARRANTY

- Ten-year limited warranty with registration.

CUSTOMIZATION OPTIONS

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH BOTH CASSED AND UNCASSED COILS, PLUS ALL AIR HANDLERS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

CUSTOM OPTIONS:

- Refrigerant Detection System (RDS) kit factory-installed.
- Left and right refrigerant connections to match OEM(s).
- Factory or field-installed TXV available.
- Powder-painted metal pans.

DOWNFLOW KIT OPTIONS:

METAL DRAIN PANS

- 16" DWNFLWM-16
- 18" DWNFLWM-18

PLASTIC DRAIN PANS

CC SERIES

- ▶ COPPER
- ▶ CASED

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

STANDARD FEATURES

- Rifled copper tubing, enhanced aluminum fins.
- Standard Upflow without field modification. Downflow applications require field kit, sold separately.
- Immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability.
- Schrader valve provided for pressure assurance testing.
- Left/right-hand standard refrigerant/plumbing connections:
 - Liquid line: 3/8" ODS
 - Suction line:
 - ▶ 3/4" ODS on 1-1/2-ton to 3-ton
 - ▶ 7/8" ODS on 3-1/2-ton to 5-ton
 - Condensate Drains: 3/4" NPT
- Embossed galvanized cabinets standard. Fully insulated cabinets with faced insulation. Split access doors in front of cabinet for easy service access.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L Refrigerants certified with Refrigerant Detection System (RDS)).
- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance.
- AHRI certifiable with all brands of A/C and heat pump systems.

WARRANTY

- Ten-year limited warranty with registration.

CUSTOMIZATION OPTIONS*

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH BOTH CASED AND UNCASSED COILS, PLUS ALL AIR HANDLERS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

CUSTOM OPTIONS:	DOWNFLOW KIT OPTIONS:	
<ul style="list-style-type: none"> • Refrigerant Detection System (RDS) kit factory-installed. • Left and right refrigerant connections to match OEM(s). • Factory or field-installed TXV available. • Powder-painted metal pans. 	METAL DRAIN PANS	PLASTIC DRAIN PANS

DC SERIES (HIGH-EFFICIENCY)

- ▶ ALUMINUM
- ▶ CASED

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

STANDARD FEATURES

- Rifled aluminum tubing, enhanced aluminum fins.
- Standard upflow without field modification. Downflow applications require field kit, sold separately.
- Multi-stage leak testing at 500 psi pressure decay, mass spectrometer tested with Helium, then Nitrogen pressurized and factory sealed optimal system integrity and long-term reliability.
- Schrader valve provided for pressure assurance testing.
- Left/right-hand standard refrigerant/plumbing connections:
 - Liquid line: 3/8" ODS
 - Suction line:
 - ▶ 3/4" ODS on 1-1/2-ton to 3-ton
 - ▶ 7/8" ODS on 3-1/2-ton to 5-ton
 - Condensate Drains: 3/4" NPT
- Heavy duty plastic or metal drain pans.
- Embossed galvanized cabinets standard. Fully insulated cabinets with faced insulation. Split access doors in front of cabinet for easy service access.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L Refrigerants certified with Refrigerant Detection System (RDS)).
- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance.
- AHRI certifiable with all brands of A/C and heat pump systems.

WARRANTY

- Ten-year limited warranty with registration.

CUSTOMIZATION OPTIONS*

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH BOTH CASED AND UNCASD COILS, PLUS ALL AIR HANDLERS.

Versa Plus™ products are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

CUSTOM OPTIONS:

- Factory or field-installed TXV available.
- High temperature plastic drain pan.
- OEM color matched cabinets.
- Refrigerant Detection System (RDS) kit factory-installed.

DOWNFLOW KIT OPTIONS:

PLASTIC DRAIN PANS

CE SERIES

▶ COPPER
▶ CASED

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

STANDARD FEATURES

- Rified copper tubing, enhanced aluminum fins.
- Standard Upflow without field modification. Downflow applications require field-installed downflow kit, sold separately.
- Immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability.
- Schrader valve provided for pressure assurance testing.
- **Left/right-hand standard refrigerant/plumbing connections:**
 - Liquid line: 3/8" ODS
 - **Condensate Drains:** 3/4" NPT
 - **Suction line:**
 - ▶ 3/4" ODS on 1-1/2-ton to 3-ton
 - ▶ 7/8" ODS on 3-1/2-ton to 5-ton
- Heavy duty plastic drain pans on most models, powder coated galvanized steel drain pans standard on all.
- Fully insulated cabinets with faced insulation. Split access doors in front of cabinet for easy service access.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L Refrigerants certified with Refrigerant Detection System (RDS)).
- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance.
- AHRI certifiable with all brands of A/C and heat pump systems.

DE SERIES (HIGH-EFFICENCY)

- ▶ ALUMINUM
- ▶ CASED

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

STANDARD FEATURES

- Rifled aluminum tubing, enhanced aluminum fins.
- Standard Upflow without field modification. Downflow applications require field-installed downflow kit, sold separately.
- Multi-stage leak testing at 500 psi pressure decay, mass spectrometer tested with Helium, then Nitrogen pressurized and factory sealed optimal system integrity and long-term reliability.
- Schrader valve provided for pressure assurance testing.
- Left/right-hand standard refrigerant and plumbing connections:
 - Liquid line: 3/8" ODS
 - **Condensate Drains:** 3/4" NPT
 - **Suction line:**
 - ▶ 3/4" ODS on 1-1/2-ton to 3-ton
 - ▶ 7/8" ODS on 3-1/2-ton to 5-ton
- Heavy duty plastic drain pans standard.
- Embossed galvanized cabinets standard. Fully insulated cabinets with faced insulation. Split access doors in front of cabinet for easy service access.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L Refrigerants certified with Refrigerant Detection System (RDS)).
- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance.
- AHRI certifiable with all brands of A/C and heat pump systems.

WARRANTY

- Ten-year limited warranty with registration.

CUSTOMIZATION OPTIONS

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH BOTH CASED AND UNCASSED COILS, PLUS ALL AIR HANDLERS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

CUSTOM OPTIONS:

- Refrigerant Detection System (RDS) kit factory-installed.
- Factory or field-installed TXV available.
- OEM color matched cabinets.
- High-temperature plastic drain pan.

DOWNFLOW KIT OPTIONS:

PLASTIC DRAIN PANS

DWNFLWP-175

CP SERIES

▶ COPPER
▶ PLENUM

Representative image only. Some models may vary in appearance.

STANDARD FEATURES

- Riffed copper tubing, enhanced aluminum fins.
- Fully insulated cabinet with plenum sides and back constructed of foil-backed, faced, one-inch thick, fiberglass duct-board.
- Immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability.
- Refrigerant lines exit from top of the coil with Schrader valve for pressure assurance testing. Refrigerant and plumbing connections:
 - Liquid line: 3/8" ODS
 - **Suction line:**
 - ▶ 3/4" ODS on 1-1/2-ton to 3-ton
 - ▶ 7/8" ODS on 3-1/2-ton to 5-ton
 - **Drain connections:**
 - **Condensate Drains:** 3/4" NPT
- Secondary metal drain pan included with 1" spacing around the cabinet for turnkey installation.
- Heavy duty polycarbonate drain pans.
- Three-piece service door on top for easy service access.
- Fully insulated cabinets with faced insulation.
- Secondary metal drain pan included with one inch spacing around the cabinet for turnkey installation.
- ETL listed for R22, R410A, R454B, and R32 refrigerants.
- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance.
- AHRI certifiable with all brands of A/C and heat pump systems.

CX SERIES ▶ COPPER

EVAPORATOR COILS
DEDICATED HORIZONTAL

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

STANDARD FEATURES

- Riffled copper tubing, enhanced aluminum fins.
- Immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability.
- Refrigerant lines exit top of coil. Schrader valve on suction line for pressure assurance testing. Refrigerant and plumbing connections:
 - All Drain Pan Connections: 3/4" NPT
- Heavy duty polycarbonate drain pans.
- Inlet and outlet opening dimensions are identical (without end caps).
- Three-piece service door on top for easy service access.
- Fully insulated cabinets with faced insulation.
- ETL listed for R22, R410A, R454B, and R32 refrigerants.
- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance.
- AHRI certifiable with all brands of A/C and heat pump systems.

WARRANTY

- Ten-year limited warranty with registration.

CUSTOMIZATION OPTIONS*

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH BOTH CASED AND UNCASSED COILS, PLUS ALL AIR HANDLERS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

CUSTOM OPTIONS:

- Refrigerant Detection System (RDS) kit factory-installed.
 - Factory or field-installed TXV available.

DP SERIES

▶ ALUMINUM
▶ PLENUM

DEDICATED HORIZONTAL
EVAPORATOR COILS

Representative image only. Some models may vary in appearance.

STANDARD FEATURES

- Riffled aluminum tubing, enhanced aluminum fins.
- Fully insulated cabinet with plenum sides and back constructed of foil-backed, faced, one-inch thick, fiberglass duct-board.
- Multi-stage leak testing at 500 psi pressure decay, mass spectrometer tested with Helium, then Nitrogen pressurized and factory sealed optimal system integrity and long-term reliability.
- Refrigerant lines exit from top of the coil with Schrader valve for pressure assurance testing. Refrigerant and plumbing connections:
 - Liquid line: 3/8" ODS
 - **Suction line:**
 - ▶ 3/4" ODS on 1-1/2-ton to 3-ton
 - ▶ 7/8" ODS on 3-1/2-ton to 5-ton
 - **Drain connections:**
 - ▶ Condensate Drains: 3/4" NPT
 - **Secondary metal drain pan** included with 1" spacing around the cabinet for turnkey installation.
- Primary heavy duty polycarbonate drain pan.
- Three-piece service door on top for easy service access.
- Fully insulated cabinets with faced insulation.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L Refrigerants certified with Refrigerant Detection System (RDS)).
- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance.
- AHRI certifiable with all brands of A/C and heat pump systems.

WARRANTY

- Ten-year limited warranty with registration.

CUSTOMIZATION OPTIONS*

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH BOTH CASED AND UNCASSED COILS, PLUS ALL AIR HANDLERS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

CUSTOM OPTIONS:

- Refrigerant Detection System (RDS) kit factory-installed.
- Factory or field-installed TXV available.

DX SERIES ▶ ALUMINUM

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

STANDARD FEATURES

- Rifled aluminum tubing, enhanced aluminum fins.
- Multi-stage leak testing at 500 psi pressure decay, mass spectrometer tested with Helium, then Nitrogen pressurized and factory sealed optimal system integrity and long-term reliability.
- Refrigerant lines exit top of coil. Schrader valve on suction line for pressure assurance testing. **Refrigerant and plumbing connections:**
 - **All Drain Pan Connections:** 3/4" NPT
- Heavy duty polycarbonate drain pans.
- Inlet and outlet opening dimensions are identical (without end caps).
- Three-piece service door on top for easy service access.
- Fully insulated cabinets with faced insulation.
- ETL listed for R22, R410A, R454B, and R32 refrigerants.
- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance.
- AHRI certifiable with all brands of A/C and heat pump systems.

WARRANTY

- Ten-year limited warranty with registration.

BH(A/L) SERIES

- ▶ COPPER
- ▶ HIGH/LOW
- ▶ R410A SERVICE

Representative images only. Some models may vary in appearance.

STANDARD FEATURES

- Rifled copper tubing, enhanced aluminum fins.
- Immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability.
- Schrader valve provided for pressure assurance testing.
- **Standard refrigerant and plumbing connections:**
 - Liquid line: 3/8" ODS
 - Suction line:
 - ▶ 3/4" ODS on 2-ton to 3-ton
 - ▶ 7/8" ODS on 4-ton to 5-ton
 - Condensate Drains: 3/4" NPT
- Bi-directional airflow.
- Heavy gauge embossed galvanized cabinet fully lined with 1/2" faced insulation.
- Flowrator standard. Factory or field-installable TXV available.
- Front access panel for easy service.
- Drain Pan: Metal High Temp (600° Temp. Limit)
- ETL listed for R410A. R410A products manufactured in 2025 or later will be labeled as "For servicing existing equipment only".

WARRANTY

- No hassle five-year limited warranty.

CH SERIES ▶ COPPER

Representative image only. Some models may vary in appearance.

STANDARD FEATURES

- Rifled copper tubing, enhanced aluminum fins.
- Immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability.
- Schrader valve provided for pressure assurance testing with 3/8" ODS Stem mounted on end of Liquid Line
- Refrigerant and plumbing connections.
 - Liquid line: 3/8" ODS
 - **Suction line:**
 - ▶ 3/4" ODS on 1-1/2-ton to 3-ton
 - ▶ 7/8" ODS on 3-1/2-ton to 5-ton
 - **Condensate Drains:** 3/4" NPT
- Fully insulated cabinets with faced insulation. Split access doors in front of cabinet for easy service access.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L Refrigerants certified with Refrigerant Detection System (RDS)).
- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance.
- AHRI certifiable with all brands of A/C and heat pump systems.

WARRANTY

- Ten-year limited warranty with registration.

CUSTOMIZATION OPTIONS*

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH BOTH CASED AND UNCASD COILS, PLUS ALL AIR HANDLERS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

CUSTOM OPTIONS:

- Factory or field-installed TXV available.

CC SERIES

▶ COPPER
▶ CASED UPFLOW

Unit shown with service panels removed. Representative image only. Some models may vary in appearance. Left-hand shown.

STANDARD FEATURES

- Rified copper tubing, enhanced aluminum fins.
- Upflow only. (Slab horizontal coils also available.)
- Immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability.
- Schrader valve provided for pressure assurance testing.
- **Left/right-hand standard refrigerant/plumbing connections:**
 - **Liquid line:** 3/8" ODS
 - **Suction line:** 7/8" ODS
 - **Condensate Drains:** 3/4" NPT
- Embossed galvanized cabinets standard. Fully insulated cabinets with faced insulation. Split access doors in front of cabinet for easy service access.
- Factory-mounted TXV (R-410A - AC & HP compatible).
- ETL listed for R410A, R454B, and R32 refrigerants (A2L Refrigerants certified with Refrigerant Detection System (RDS)).
- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. Light commercial A2L RDS kits sold separately.

WARRANTY

- No hassle five-year limited warranty.

BH SERIES

- ▶ COPPER
- ▶ SLAB HORIZONTAL

STANDARD FEATURES

- Rifled copper tubing, enhanced aluminum fins.
- Single circuit. Dual circuitry available.
 - Dual circuit coils can be split top-to-bottom (TTB) or interfaced (INT).
- Immersion tested at 500 psi, followed by nitrogen pressurization and factory sealed to ensure optimal system integrity and long-term reliability.
- Single/Double Circuit refrigerant and plumbing connections:
 - 072 Single Circuit Coils: 7/8" OD Suction + 3/8" OD Liquid
 - **090/120 Single Circuit Coils:** 1-1/8" OD Suction + 1/2" OD Liquid
 - **072 Dual Circuit Coils:** (2) 3/4" OD Suction + (2) 3/8" OD Liquid
 - **090 & 120 Dual Circuit Coils:** (2) 7/8" OD Suction + (2) 3/8" OD Liquid
 - **Condensate Drains:** 3/4" NPT
- Powder-painted galvanized steel drain pans.
- Front access panel for easy service.
- Heavy gauge embossed galvanized cabinets fully lined with 1/2" faced insulation.
- Factory installed Non-Bleed port TXV(s) standard.
- ETL listed for R22, R410A, R454B, and R32 refrigerants.
- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance.
- **Light commercial A2L RDS kits sold separately.**

WARRANTY

- No hassle five-year limited warranty.

AHRI QUICK MATCH TOOL

Identify the correct AHRI-certified match for any Aspen coil, air handler, or Aspen PRO air handler. Available on the Resources page.

In keeping with its commitment to continuous improvement, Aspen Manufacturing reserves the right to make changes without notice and incurring obligation. To stay up-to-date with this product and Aspen's trusted line of coils, air handlers, and more, go to our website. © 2026 Aspen Manufacturing. All Rights Reserved

AAM SERIES ▶ COPPER ▶ ELECTRIC

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Upflow or horizontal right as shipped (field-convertible for downflow or horizontal left applications). Can be AHRI matched with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

240V PSC MOTOR

The 240V PSC Motor with Electric Heat Option features a direct drive, multi-speed blower that delivers quiet and efficient air circulation. A Multi-speed motor allows for precise airflow selection, while clearly labeled motor terminals make speed adjustments simple and accurate. The rail mounted blower assembly enables quick removal for easy service and maintenance. Built for reliability and consistent performance, this motor option is ideal for electric heat applications.

BLOWER

Direct drive blowers circulate air quietly and efficiently. Blowers mounted on rails so they can be easily removed for service.

ELECTRONIC CONTROL BOARD

Electronic circuit board provides 30 secs ON/OFF blower time delay extracting more heat/cool from the coil. Automotive-style pull fuse protection on the circuit board to provide low voltage and transformer protection.

LOW LEAKAGE CABINET

Sturdy, fully insulated galvanized steel cabinet; 1/2" insulation. Unit ships with disposable filter. Less than 2% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Unit must be installed according to Aspen installation instructions.

DX COIL

High-efficiency rifled copper tubes and enhanced aluminum fins provide maximum heat transfer. All coils are immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability.

Available with either orifice or TXV metering device. Field-installable bolt-on TXVs are also available. Heavy duty plastic drain pans on most models, powder coated galvanized steel horizontal drain pans standard on all. Optional galvanized metal drain pan with bottom primary and secondary drain connections or alternate right side primary option available. Fully insulated cabinets with faced insulation. Split access doors in front of cabinet for easy service access.

MODULAR ELECTRIC HEAT KITS

Heat kits available with either circuit breakers or terminal blocks. Available from 3 to 25 KW. Models with electric heat include sequencers and temperature limit switches for safe, efficient operation. Modules are easily installed in the field using molex plugs or can be ordered factory-installed. Controls are accessible from the front for easy service. Electrical connections can be made from the top or left. Disconnect does not protrude through the wall panel. Fan time delay relay standard for increased efficiency.

WARRANTY Ten-year limited parts warranty with registration.

OPTIONS Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASED COILS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

OTHER POPULAR CUSTOM OPTION:

Factory or field-installed TXV available.

DOWNFLOW KIT OPTIONS:

METAL DRAIN PANS

- 16" DWNFLWM-16
- 18" DWNFLWM-18

PLASTIC DRAIN PANS

AEM SERIES (HIGH-EFFICIENCY)

- ▶ COPPER
- ▶ ELECTRIC

MULTI-POSITION
AIR HANDLERS

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Upflow or horizontal right as shipped (field-convertible for downflow or horizontal left applications). Can be AHRI matched with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

240V CONSTANT TORQUE ECM MOTOR

Pre-programmed, 5-speed, 208V/240V ECM motors that ensure higher efficiency and increased energy savings by delivering constant torque during operation. Motors are pre-programmed with speeds and torques at the factory for optimal performance and reliability. Direct drive blowers circulate air quietly and efficiently. Rail mounted blowers provide easy removal for service and maintenance.

ENERGY EFFICIENT BLOWER

Direct drive blowers circulate air quietly and efficiently. Blowers mounted on rails so they can be easily removed for service.

ELECTRONIC CONTROL BOARD

Electronic circuit board provides 30 secs ON/OFF blower time delay extracting more heat/cool from the coil. Automotive-style pull fuse protection on the circuit board to provide low voltage and transformer protection.

LOW LEAKAGE CABINET

Sturdy, fully insulated galvanized steel cabinet; stick pins ensure 1/2" insulation remains in place. Unit ships with disposable filter. Less than 2% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Unit must be installed according to Aspen installation instructions.

DX COIL

High-efficiency rifled copper tubes and enhanced aluminum fins provide maximum heat transfer. All coils are immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability.

Available with either orifice or TXV metering device. Field-installable bolt-on TXVs are also available. Heavy duty plastic drain pans on most models, powder coated galvanized steel horizontal drain pans standard on all. Optional galvanized metal drain pan with bottom primary and secondary drain connections or alternate right side primary option available. Fully insulated cabinets with faced insulation. Split access doors in front of cabinet for easy service access. **Left/right-hand standard refrigerant and plumbing connections include:**

MODULAR ELECTRIC HEAT KITS

Heat kits available with either circuit breakers or terminal blocks. Available from 3 to 25 KW. Models with electric heat include sequencers and temperature limit switches for safe, efficient operation. Modules are easily installed in the field using molex plugs or can be ordered factory-installed. Controls are accessible from the front for easy service. Electrical connections can be made from the top or left. Disconnect does not protrude through the wall panel. Fan time delay relay standard for increased efficiency.

WARRANTY Ten-year limited parts warranty with registration. **OPTIONS** Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT		
UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS		
<p>IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASED COILS!</p> <p>Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.</p>		
OTHER POPULAR CUSTOM OPTION:	DOWNFLOW KIT OPTIONS:	
Factory or field-installed TXV available.	METAL DRAIN PANS	PLASTIC DRAIN PANS
	<ul style="list-style-type: none"> • 16" DWNFLWM-16 • 18" DWNFLWM-18 	DWNFLWP

LAM SERIES

- ▶ ALUMINUM
- ▶ ELECTRIC

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Upflow or horizontal right as shipped (field-convertible for downflow or horizontal left applications). Can be AHRI certified with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

240V PSC MOTOR

The 240V PSC Motor with Electric Heat Option features a direct drive, multi-speed blower that delivers quiet and efficient air circulation. A two-speed motor allows for precise airflow selection, while clearly labeled motor terminals make speed adjustments simple and accurate. The plate-mounted blower assembly enables quick removal for easy service and maintenance. Built for reliability and consistent performance, this motor option is ideal for electric heat applications.

BLOWER

Direct drive blowers circulate air quietly and efficiently. Blowers mounted on rails so they can be easily removed for service.

ELECTRONIC CONTROL BOARD

An electronic board controls the functioning of the system reducing moving parts. The board provides a blower time delay to maximize heat/cool extraction and offers an integrated fuse for additional protection.

LOW LEAKAGE CABINET

Sturdy, fully insulated galvanized steel. Less than 2% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Unit must be installed according to installation instructions.

ALL ALUMINUM COIL

High-Efficiency rifled aluminum tubes and enhanced aluminum fins provide maximum heat transfer. All coils factory leak tested with Multi-stage leak testing at 500 psi pressure decay, mass spectrometer tested with Helium, then Nitrogen pressurized and factory sealed optimal system integrity and long-term reliability. Coil mounted Schrader valve allows pre-installation pressure assurance testing.

Available with either factory installed orifice or TXV metering device. Access door allows or easy coil cleaning.

MODULAR ELECTRIC HEAT KITS

Heat kits available with either circuit breakers or terminal blocks. Available from 3 to 25 KW. Models with electric heat include sequencers and temperature limit switches for safe, efficient operation. Modules are easily installed in the field using molex plugs or can be ordered factory-installed. Controls are accessible from the front for easy service. Electrical connections can be made from the top or left. Disconnect does not protrude through the wall panel. Fan time delay relay standard for increased efficiency.

WARRANTY Ten-year limited warranty with registration.

OPTIONS Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASSED COILS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

OTHER POPULAR CUSTOM OPTION:

Factory or field-installed TXV available.

DOWNFLOW KIT OPTIONS:

METAL DRAIN PANS

- 16" DWNFLWM-16
- 18" DWNFLWM-18

PLASTIC DRAIN PANS

DWNFLWP

R51341 11/25

LEM SERIES (HIGH-EFFICIENCY)

- ▶ ALUMINUM
- ▶ ELECTRIC

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Upflow or horizontal right as shipped (field convertible for downflow or horizontal left applications). Can be AHRI certified with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

240V CONSTANT TORQUE ECM MOTOR

Pre-programmed, 5-speed, 208V/240V ECM motors that ensure higher efficiency and increased energy savings by delivering constant torque during operation. Motors are pre-programmed with speeds and torques at the factory for optimal performance and reliability. Direct drive blowers circulate air quietly and efficiently. Rail mounted blowers provide easy removal for service and maintenance.

BLOWER

Direct drive blowers circulate air quietly and efficiently. Motor speeds can be easily selected via motor terminals. Blowers mounted on rails so they can be easily removed for service.

ELECTRONIC CONTROL BOARD

Electronic circuit board provides 30 secs ON/OFF blower time delay extracting more heat/cool from the coil. Automotive-style pull fuse protection on the circuit board to provide low voltage and transformer protection.

LOW LEAKAGE CABINET

Sturdy, fully insulated galvanized steel cabinet with knockout for duct return. Less than 2% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Unit must be installed according to installation instructions.

DX COIL

High-Efficiency rifled aluminum tubes and enhanced aluminum fins provide maximum heat transfer. All coils factory leak tested with Multi-stage leak testing at 500 psi pressure decay, mass spectrometer tested with Helium, then Nitrogen pressurized and factory sealed optimal system integrity and long-term reliability. Coil mounted Schrader valve allows pre-installation pressure assurance testing.

Available with either factory-installed orifice or TXV metering device. Field-installable bolt-on TXVs are also available. Access door allows for easy coil cleaning.

MODULAR ELECTRIC HEAT KITS

Heat kits available with either circuit breakers or terminal blocks. Available from 3 to 25 KW. Models with electric heat include sequencers and temperature limit switches for safe, efficient operation. Modules are easily installed in the field using molex plugs or can be ordered factory-installed. Controls are accessible from the front for easy service. Electrical connections can be made from the top or left. Disconnect does not protrude through the wall panel. Fan time delay relay standard for increased efficiency.

WARRANTY Ten-year limited warranty with registration. **OPTIONS** Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASSED COILS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

OTHER POPULAR CUSTOM OPTION:

Factory or field-installed TXV available.

DOWNFLOW KIT OPTION:

PLASTIC DRAIN PANS

DWNFLWP-175

R51341 11/25

LGM SERIES

▶ ALUMINUM
▶ ELECTRIC

MULTI-POSITION
AIR HANDLERS

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Upflow or horizontal right as shipped (field convertible for downflow or horizontal left applications). Can be AHRI certified with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

120V CONSTANT TORQUE ECM MOTOR

Constant torque ECM speeds and torques are controlled by software embedded in the motor to maintain constant torque. Motors are pre-programmed with speeds and torques at the factory for optimal performance and reliability. Direct drive blowers circulate air quietly and efficiently. Rail mounted blowers provide easy removal for service and maintenance.

BLOWER

Direct drive blowers circulate air quietly and efficiently. Blowers mounted on rails so they can be easily removed for service.

ELECTRONIC CONTROL BOARD

An electronic board controls the functioning of the system, reducing moving parts. The board provides a blower time delay to maximize heat/cool extraction and offers an integrated fuse for additional protection.

LOW LEAKAGE CABINET

Sturdy, fully insulated galvanized steel cabinet with knockout for duct return. Less than 2% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Unit must be installed according to installation instructions.

ALL ALUMINUM COIL

High-efficiency rifled aluminum tubes and enhanced aluminum fins provide maximum heat transfer. All coils factory leak tested with Multi-stage leak testing at 500 psi pressure decay, mass spectrometer tested with Helium, then Nitrogen pressurized and factory sealed optimal system integrity and long-term reliability. Coil mounted Schrader valve allows pre-installation pressure assurance testing.

Available with either factory-installed orifice or TXV metering device. Field-installable bolt-on TXVs are also available. Access door allows for easy coil cleaning.

WARRANTY Ten-year limited parts warranty with registration.

OPTIONS Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASSED COILS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

OTHER POPULAR CUSTOM OPTION:

Factory or field-installed TXV available.

DOWNFLOW KIT OPTIONS:

METAL DRAIN PANS

- 16" DWNFLWM-16
- 18" DWNFLWM-18

PLASTIC DRAIN PANS

DWNFLWP

R51341 11/25

ABM SERIES

▶ COPPER
▶ HYDRONIC

MULTI-POSITION
AIR HANDLERS

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Upflow or horizontal right as shipped (field-convertible for downflow or horizontal left applications). Can be AHRI matched with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

120V PSC HYDRONIC MOTOR

Air Handlers come equipped with a standard 120-volt, multi-speed, single-stage PSC motor.

BLOWER

Direct drive multi-speed blowers circulate air quietly and efficiently. Motor speeds can be easily selected via motor terminals. Rail mounted blowers can be easily removed for service.

ELECTRONIC CONTROL BOARD

Electronic circuit board provides 30 sec. ON/OFF blower time delay extracting more heat/cool from the coil. An electronic board controls the functioning of the system reducing moving parts. The board provides for various hot water supply source connections and the blower time delay to maximize heat/cool extraction. As an enhanced feature the pump circulates hot water every 6 hours to prevent water stagnation and coil freezing.

LOW LEAKAGE CABINET

Less than 1.4% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Sturdy, galvanized steel cabinet with painted front panels. Cabinet fully insulated with 1/2" faced insulation to encapsulate glass fibers, to prevent sweating, and to provide excellent R-value. Stick pins ensure insulation remains in place.

DX COIL

High-efficiency rifled copper tubes and enhanced aluminum fins provide maximum heat transfer. All coils are immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability. Liquid-line Schrader valve allows pre-installation pressure assurance testing.

Available with either orifice or TXV metering device. Field-installable bolt-on TXVs are also available. Rugged GLP drain pan holds minimal condensate while eliminating the possibility of corrosion. Drain pan is UV safe. All drain connections are 3/4" NPT. Access door allows for coil cleaning.

MODULAR HYDRONIC HEAT KITS

Air Handlers are available with either factory-installed circuit breakers or terminal blocks. Hydronic coils come in 2, 3 and 4 row with the options of pump or no pump configurations. Freeze stat is standard, wired into circulating pump control circuit. Controls are accessible from the front for easy service. Electrical connections can be made from the top or left. Fan time delay relay standard for increased efficiency. Heat kits are available with or without circulating pump and check valve. Units are provided with auxiliary relay for remote pump. Schrader valve ports are standard on water-out manifold, hose bib available as an option.

WARRANTY Five-year limited parts warranty with registration.

OPTIONS Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASSED COILS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

OTHER POPULAR CUSTOM OPTION:

Factory or field-installed TXV available.

DOWNFLOW KIT OPTIONS:

METAL DRAIN PANS

- 16" DWNFLWM-16
- 18" DWNFLWM-18

PLASTIC DRAIN PANS

DWNFLWP

R51341 11/25

AFM SERIES

▶ COPPER
▶ HYDRONIC

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Upflow or horizontal right as shipped (field convertible for downflow or horizontal left applications). Can be AHRI certified with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

120V CONSTANT TORQUE ECM MOTOR

Pre-programmed, 5-speed, 120V ECM motors that ensure higher efficiency and increased energy savings by delivering constant torque during operation. Motors are pre-programmed with speeds and torques at the factory for optimal performance and reliability. Direct drive blowers circulate air quietly and efficiently. Rail mounted blowers provide easy removal for service and maintenance.

BLOWER

Direct drive blowers circulate air quietly and efficiently. Blowers mounted on rails so they can be easily removed for service.

ELECTRONIC CONTROL BOARD

Electronic circuit board provides 30 seconds of ON/OFF blower time delay extracting more heat/cool from the coil. An electronic board controls the functioning of the system reducing moving parts. The board provides for various hot water supply source connections and the blower time delay to maximize heat/cool extraction. As an enhanced feature the pump circulates hot water every 6 hours to prevent water stagnation and coil freezing.

LOW LEAKAGE CABINET

Less than 2% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Sturdy, galvanized steel cabinet with painted front panels. Cabinet fully insulated with 1/2" faced insulation to encapsulate glass fibers, to prevent sweating, and to provide excellent R-value. Stick pins ensure insulation remains in place.

DX COIL

High-efficiency rifled copper tubes and enhanced aluminum fins provide maximum heat transfer. All coils are immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability. Coil mounted Schrader valve allows pre-installation pressure assurance testing. Available with either flowrator or TXV metering device.

Field-installable TXVs are also available. Rugged GLP drain pan holds minimal condensate while eliminating the possibility of corrosion. Drain pans are UV safe. GLP drain pans with bottom primary and secondary drain connections or alternate right-side primary. All connections 3/4" NPT. Access door allows for coil cleaning.

MODULAR HYDRONIC HEAT KITS

Air Handlers are available with either factory-installed circuit breakers or terminal blocks. Hydronic Coils come in 2, 3 and 4 row with the options of pump or no pump configurations. Freeze stat is standard, wired into circulating pump control circuit. Controls are accessible from the front for easy service. Electrical connections can be made from the top or left. Fan time delay relay standard for increased efficiency. Heat kits are available with or without circulating pump and check valve. Units are provided with auxiliary relay for remote pump. Schrader valve ports are standard on water-out manifold, hose bib available as an option.

WARRANTY Five-year limited parts warranty with registration.

OPTIONS Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASD COILS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

OTHER POPULAR CUSTOM OPTION:	DOWNFLOW KIT OPTIONS:	
	METAL DRAIN PANS	PLASTIC DRAIN PANS
Factory or field-installed TXV available.	22" DWNFLWM-22	DWNFLWP

AFL SERIES

▶ COPPER
▶ HYDRONIC

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Upflow, downflow, horizontal left or horizontal right.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

120V CONSTANT TORQUE ECM MOTOR

Air handler models come equipped with a 5-speed, constant torque ECM. Motor speed and torque are managed via integrated software to ensure consistent torque output across all operating conditions.

MODULAR HYDRONIC HEAT KITS

Air Handlers are available with either factory-installed circuit breakers or terminal blocks. Hydronic Coils come in 2, 3 and 4 row with the options of pump or no pump configurations. Freeze stat is standard, wired into circulating pump control circuit. Controls are accessible from the front for easy service. Electrical connections can be made from the top or left. Fan time delay relay standard for increased efficiency. Heat kits are available with or without circulating pump and check valve. Units are provided with auxiliary relay for remote pump. Schrader ports are standard on water-out manifold, hose bib available as an option.

BLOWER

Direct drive blowers circulate air quietly and efficiently. Blowers mounted on rails so they can be easily removed for service.

LOW LEAKAGE CABINET

Less than 2% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Sturdy, galvanized steel cabinet with painted front panels. Cabinet fully insulated with 1/2" faced insulation to encapsulate glass fibers, to prevent sweating, and to provide excellent R-value. Stick pins ensure insulation remains in place.

WARRANTY Five-year limited parts warranty with registration.

Learn more about Aspen's A2L Refrigerant Technology for R32 and R454B Systems.

AEW SERIES (HIGH-EFFICIENCY)

▶ COPPER
▶ ELECTRIC

AIR HANDLERS
WALL MOUNT

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Front or bottom return air position. Offset hanging brackets attach to unit and wall to allow hanging inside closet. Can be AHRI matched with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant-ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

240V CONSTANT TORQUE ECM MOTOR

Pre-programmed, 5-speed, 208V/240V ECM motors that ensure higher efficiency and increased energy savings by delivering constant torque during operation. Motors are pre-programmed with speeds and torques at the factory for optimal performance and reliability. Direct drive blowers circulate air quietly and efficiently. Rail mounted blowers provide easy removal for service and maintenance.

BLOWER

Direct drive multi-speed blowers circulate air quietly and efficiently. Motor speeds can be easily selected via motor terminals. Rail mounted blowers can be easily removed for service.

ELECTRONIC CIRCUIT BOARD

Electronic circuit board provides 30 secs ON/OFF blower time delay extracting more heat/cool from the coil. Automotive-style pull fuse protection on the circuit board to provide low voltage and transformer protection.

LOW LEAKAGE CABINET

Sturdy, fully insulated galvanized steel cabinet; stick pins ensure 1/2" insulation remains in place. Unit ships with disposable filter. Less than 1.4% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Unit must be installed according to Aspen installation instructions.

DX COIL

High-efficiency rifled copper tubes and enhanced aluminum fins provide maximum heat transfer. All coils are immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability. Liquid-line Schrader valve allows pre-installation pressure assurance testing.

Available with either check style flowrator or TXV metering device. Field-installable TXVs are also available. Galvanized metal drain pan with bottom primary and secondary drain connections or alternate right side primary. All connections 3/4" NPT. Access door allows for coil cleaning.

MODULAR ELECTRIC HEAT KITS

Heat kits available with either circuit breakers or terminal blocks. Available from 3 to 10 KW. Models with electric heat include sequencers and temperature limit switches for safe, efficient operation. Modules are easily installed in the field using molex plugs or can be ordered factory-installed. Controls are accessible from the front for easy service. Electrical connections can be made from the top or left. Disconnect does not protrude through the wall panel. Fan time delay relay standard for increased efficiency.

WARRANTY Ten-year limited parts warranty with registration.

OPTIONS Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASSED COILS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

OTHER POPULAR CUSTOM OPTION:

- Factory or field-installed TXV available.

R51341 11/25

ABW SERIES

▶ COPPER
▶ HYDRONIC

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Front or bottom return air. Offset hanging brackets attach to unit and wall to allow hanging inside closet. Can be AHRI matched with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

120V PSC HYDRONIC MOTOR

Air Handlers come equipped with a standard 120-volt, multi-speed, single-stage PSC motor.

BLOWER

Direct drive multi-speed blowers circulate air quietly and efficiently. Motor speeds can be easily selected via motor terminals. Rail mounted blowers can be easily removed for service.

ELECTRONIC CONTROL BOARD

Electronic circuit board provides 30 sec. ON/OFF blower time delay extracting more heat/cool from the coil. An electronic board controls the functioning of the system reducing moving parts. The board provides for various hot water supply source connections and the blower time delay to maximize heat/cool extraction. As an enhanced feature the pump circulates hot water every 6 hours to prevent water stagnation and coil freezing.

LOW LEAKAGE CABINET

Sturdy, fully insulated galvanized steel cabinet; stick pins ensure 1/2" insulation remains in place. Unit ships with disposable filter. Less than 2.0% air leakage from cabinet when tested in accordance with ASHRAE standard 193.

DX COIL

High-efficiency rifled copper tubes and enhanced aluminum fins provide maximum heat transfer. All coils are immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability. Liquid-line Schrader valve allows pre-installation pressure assurance testing.

Available with either orifice or TXV metering device. Field-installable bolt-on TXVs are also available. Rugged GLP drain pan holds minimal condensate while eliminating the possibility of corrosion. Drain pan is UV safe. All drain connections are 3/4" NPT. Access door allows for coil cleaning.

MODULAR HYDRONIC HEAT KITS

Heat kits available with either circuit breakers or terminal blocks. Available in 2, 3 and 4 row, providing 16,000 to 59,000 BTU's of heat. Heat kits are factory-installed. Freeze stat is standard, wired into circulating pump control circuit. Controls are accessible from the front for easy service. Electrical connections can be made from the top or left. Suitable for potable applications. Fan time delay relay standard increased efficiency. Heat kits are available with or without circulating pump and check valve. Units are provided with auxiliary relay for remote pump. Schrader valve ports are standard on water-out manifold, hose bib available as an option. Totally lead free constructed coil. Suitable for potable applications.

WARRANTY Five-year limited parts warranty with registration.

OPTIONS Ask your local Aspen Sales Rep for customization options.

AIR HANDLERS
WALL MOUNT

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Front or bottom return air. Offset hanging brackets attach to unit and wall to allow hanging inside closet. Can be AHRI matched with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

120V CONSTANT TORQUE ECM MOTOR

Pre-programmed, 5-speed, 120V ECM motors that ensure higher efficiency and increased energy savings by delivering constant torque during operation. Motors are pre-programmed with speeds and torques at the factory for optimal performance and reliability. Direct drive blowers circulate air quietly and efficiently. Rail mounted blowers provide easy removal for service and maintenance.

BLOWER

Direct drive multi-speed blowers circulate air quietly and efficiently. Motor speeds can be easily selected via motor terminals. Rail mounted blowers can be easily removed for service.

ELECTRONIC CONTROL BOARD

Electronic circuit board provides 30 sec. ON/OFF blower time delay extracting more heat/cool from the coil. An electronic board controls the functioning of the system reducing moving parts. AAW SERIES ▶ COPPER ▶ ELECTRIC

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Front or bottom return air position. Offset hanging brackets attach to unit and wall to allow hanging inside closet. Can be AHRI matched with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant-ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

240V PSC MOTOR

The 240V PSC Motor with Electric Heat Option features a direct drive, multi-speed blower that delivers quiet and efficient air circulation. A two-speed motor allows for precise airflow selection, while clearly labeled motor terminals make speed adjustments simple and accurate. The plate-mounted blower assembly enables quick removal for easy service and maintenance. Built for reliability and consistent performance, this motor option is ideal for electric heat applications.

BLOWER

Direct drive multi-speed blowers circulate air quietly and efficiently. Motor speeds can be easily selected via motor terminals. Rail mounted blowers can be easily removed for service.

ELECTRONIC CIRCUIT BOARD

Electronic circuit board provides 30 secs ON/OFF blower time delay extracting more heat/cool from the coil. Automotive-style pull fuse protection on the circuit board to provide low voltage and transformer protection. Fan time delay relay standard for increased efficiency.

LOW LEAKAGE CABINET

Sturdy, fully insulated galvanized steel cabinet; stick pins ensure 1/2" insulation remains in place. Unit ships with disposable filter. Less than 1.4% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Unit must be installed according to Aspen installation instructions.

DX COIL

High-efficiency rifled copper tubes and enhanced aluminum fins provide maximum heat transfer. All coils are immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability. Coil mounted Schrader valve allows pre-installation pressure testing.

Available with either check style flowrator or TXV metering device. Field-installable TXVs are also available. Powder coated metal drain pan holds minimal condensate while eliminating the possibility of corrosion. Drain pans with bottom primary and secondary drain connections or alternate right-side primary. All connections 3/4" FPT. Access door allows for coil cleaning.

MODULAR ELECTRIC HEAT KITS

Heat kits available with either circuit breakers or terminal blocks. Available from 3 to 10 KW. Models with electric heat include sequencers and temperature limit switches for safe, efficient operation. Modules are easily installed in the field using molex plugs or can be ordered factory-installed. Controls are accessible from the front for easy service. Electrical connections can be made from the top or left. Disconnect does not protrude through the wall panel.

WARRANTY Ten-year limited parts warranty with registration.

OPTIONS Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASED COILS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

LEW SERIES

▶ ALUMINUM
▶ ELECTRIC

AIR HANDLERS
VERTICAL WALL MOUNT

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Front or bottom return air position. Offset hanging brackets attach to unit and wall to allow hanging inside closet. Can be AHRI matched with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

240V CONSTANT TORQUE ECM MOTOR

Pre-programmed, 5-speed, 208V/240V ECM motors that ensure higher efficiency and increased energy savings by delivering constant torque during operation. Motors are pre-programmed with speeds and torques at the factory for optimal performance and reliability. Direct drive blowers circulate air quietly and efficiently. Rail mounted blowers provide easy removal for service and maintenance.

BLOWER

Direct drive multi-speed blowers circulate air quietly and efficiently. Motor speeds can be easily selected via motor terminals. Rail mounted blowers can be easily removed for service.

ELECTRONIC CIRCUIT BOARD

Electronic circuit board provides 30 seconds ON/OFF blower time delay extracting more heat/cool from the coil. Automotive-style pull fuse protection on the circuit board to provide low voltage and transformer protection.

LOW LEAKAGE CABINET

Sturdy, fully insulated galvanized steel cabinet; stick pins ensure 1/2" insulation remains in place. Unit ships with disposable filter. Less than 1.4% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Unit must be installed according to Aspen installation instructions.

DX COIL

High-Efficiency rifled aluminum tubes and enhanced aluminum fins provide maximum heat transfer. All coils factory leak tested with Multi-stage leak testing at 500 psi pressure decay, mass spectrometer tested with Helium, then Nitrogen pressurized and factory sealed optimal system integrity and long-term reliability. Coil mounted Schrader valve allows pre-installation pressure assurance testing.

Available with either factory-installed orifice or TXV metering device. Field-installable bolt-on TXVs are also available. Access door allows for easy coil cleaning.

MODULAR ELECTRIC HEAT KITS

Heat kits available with either circuit breakers or terminal blocks. Available from 3 to 10 KW. Models with electric heat include sequencers and temperature limit switches for safe, efficient operation. Modules are easily installed in the field using molex plugs or can be ordered factory-installed. Controls are accessible from the front for easy service. Electrical connections can be made from the top or left. Disconnect does not protrude through the wall panel. Fan time delay relay standard for increased efficiency.

WARRANTY Ten-year limited parts warranty with registration.

OPTIONS Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASSED COILS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

OTHER POPULAR CUSTOM OPTION:

Factory or field-installed TXV available.

R51341 11/25

AIR HANDLERS
CEILING MOUNT

Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Built-in mounting tabs for ceiling or fur down mounting. Louvered ceiling access panel has separate frame that attaches to ceiling joists. Solid access panel available for use with end return installations. Can be AHRI matched with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

240V PSC MOTOR

The 240V PSC Motor with Electric Heat Option features a direct drive, multi-speed blower that delivers quiet and efficient air circulation. A two-speed motor allows for precise airflow selection, while clearly labeled motor terminals make speed adjustments simple and accurate. Built for reliability and consistent performance, this motor option is ideal for electric heat applications.

BLOWER

Direct drive multi-speed blowers circulate air quietly and efficiently. Blowers mounted on rails so they can be easily removed for service.

ELECTRONIC CONTROLS

Units available with either circuit breakers or terminal blocks. Controls easily accessible from the front for easy service. Fan time delay relay standard for increased efficiency. Electrical connections can be made from the top, left, or right.

ELECTRONIC CIRCUIT BOARD

Electronic circuit board provides 30 secs ON/OFF blower time delay extracting more heat/cool from the coil.

LOW LEAKAGE CABINET

Sturdy, fully insulated galvanized steel cabinet with painted front panels. Less than 2% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Unit must be installed according to Aspen installation instructions.

DX COIL

High-efficiency rifled copper tubes and enhanced aluminum fins provide maximum heat transfer. All coils are immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability. Liquid-line Schrader valve allows pre-installation pressure assurance testing.

Available with either check style flowrator or TXV metering device. Field-installable TXVs are also available. Galvanized metal drain pan with bottom primary and secondary drain connections or alternate right side primary. All connections 3/4" NPT. Access door allows for coil cleaning.

ELECTRIC HEATERS

Models with electric heat include sequencers and temperature limit switches for safe, efficient operation.

CUSTOMIZATION

Factory or field-installable TXV. OEM color matched cabinets. High temperature plastic drain pans.

WARRANTY Free five-year limited parts warranty.

OPTIONS Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASSED COILS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

OTHER POPULAR CUSTOM OPTION:

Factory or field-installed TXV available.

R51341 1025

AEC SERIES ▶ COPPER ▶ ELECTRIC

Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Built-in mounting tabs for ceiling or fur down mounting. Louvered ceiling access panel has separate frame that attaches to ceiling joists. Solid access panel available for use with end return installations. Can be AHRI matched with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

240V CONSTANT TORQUE ECM MOTOR

Pre-programmed, 5-speed, 208V/240V ECM motors that ensure higher efficiency and increased energy savings by delivering constant torque during operation. Motors are pre-programmed with speeds and torques at the factory for optimal performance and reliability.

BLOWER

Direct drive multi-speed blowers circulate air quietly and efficiently. Motor speeds can be easily selected via motor terminals. Rail mounted blowers can be easily removed for service.

ELECTRONIC CIRCUIT BOARD

Electronic circuit, board provides 30 secs ON/OFF blower time delay extracting more heat/cool from the coil.

LOW LEAKAGE CABINET

Sturdy, galvanized steel cabinet with knockout for duct return. The cabinet is fully insulated with 1/2" faced insulation to prevent sweating, to encapsulate glass fibers, and to provide excellent R-value. Stick pins ensure insulation remains in place. Less than 2% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Unit must be installed according to Aspen installation instructions.

DX COIL

High-efficiency rifled copper tubes and enhanced aluminum fins provide maximum heat transfer. All coils are immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability. Liquid-line Schrader valve allows pre-installation pressure assurance testing.

Available with either check style flowrator or TXV metering device. Field-installable TXVs are also available. Galvanized metal drain pan with bottom primary and secondary drain connections or alternate right side primary. All connections 3/4" NPT. Access door allows for coil cleaning.

MODULAR HEAT KITS

Heat kits available with terminal blocks. Available in 3 to 10 KW. Models with electric heat include sequencers and temperature limit switches for safe, efficient operation. Easily accessible controls for quick service. Disconnect does not protrude through the wall panel.

WARRANTY Five-year limited parts warranty with registration.

OPTIONS Ask your local Aspen Sales Rep for customization options.

ASPENPRO AIR HANDLERS
VERTICAL WALL MOUNT

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Front or bottom return air position. Offset hanging brackets attach to unit and wall to allow hanging inside closet. Can be AHRI matched with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

240V PSC MOTOR

The 240V PSC Motor with Electric Heat Option features a direct drive, multi-speed blower that delivers quiet and efficient air circulation. A two-speed motor allows for precise airflow selection, while clearly labeled motor terminals make speed adjustments simple and accurate. The plate-mounted blower assembly enables quick removal for easy service and maintenance. Built for reliability and consistent performance, this motor option is ideal for electric heat applications.

BLOWER

Direct drive multi-speed blowers circulate air quietly and efficiently. Motor speeds can be easily selected via motor terminals. Rail mounted blowers can be easily removed for service.

ELECTRONIC CIRCUIT BOARD

Electronic circuit board provides 30 secs ON/OFF blower time delay extracting more heat/cool from the coil. Automotive-style pull fuse protection on the circuit board to provide low voltage and transformer protection. Fan time delay relay standard for increased efficiency.

LOW LEAKAGE CABINET

Sturdy, fully insulated galvanized steel cabinet; stick pins ensure 1/2" insulation remains in place. Unit ships with disposable filter. Less than 1.4% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Unit must be installed according to Aspen installation instructions.

DX COIL

High-efficiency rifled copper tubes and enhanced aluminum fins provide maximum heat transfer. All coils are immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability. Coil mounted Schrader allows pre-installation pressure testing.

Available with either check style flowrator or TXV metering device. Field-installable TXVs are also available. Powder coated metal drain pan holds minimal condensate while eliminating the possibility of corrosion. Drain pans with bottom primary and secondary drain connections or alternate right-side primary. All connections 3/4" FPT. Access door allows for coil cleaning.

MODULAR ELECTRIC HEAT KITS

Heat kits available with either circuit breakers or terminal blocks. Available from 3 to 10 KW. Models with electric heat include sequencers and temperature limit switches for safe, efficient operation. Modules are easily installed in the field using molex plugs or can be ordered factory-installed. Controls are accessible from the front for easy service. Electrical connections can be made from the top or left. Disconnect does not protrude through the wall panel.

WARRANTY Ten-year limited parts warranty with registration.

OPTIONS Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASD COILS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

OTHER POPULAR CUSTOM OPTION:

Factory or field-installed TXV available.

ACCESS DOOR

VERSATILITY

Equipped with hidden frame feature. Fastens to the outside wall surface and does not have to perfectly match the hole opening. Frame screws are not visible after installation. Available in either solid (S) or louvered (L) style.

MATERIALS

Galvanized steel construction with smooth powder paint finish.

FILTER

20" x 20" x 1" field supplied.

ASPENPRO AIR HANDLERS
WALL MOUNT

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Front or bottom return air position. Offset hanging brackets attach to unit and wall to allow hanging inside closet. Can be AHRI matched with most brands of air conditioners or heat pumps.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

240V CONSTANT TORQUE ECM MOTOR

Pre-programmed, 5-speed, 208V/240V ECM motors that ensure higher efficiency and increased energy savings by delivering constant torque during operation. Motors are pre-programmed with speeds and torques at the factory for optimal performance and reliability. Direct drive blowers circulate air quietly and efficiently. Rail mounted blowers provide easy removal for service and maintenance.

BLOWER

Direct drive multi-speed blowers circulate air quietly and efficiently. Motor speeds can be easily selected via motor terminals. Rail mounted blowers can be easily removed for service.

ELECTRONIC CIRCUIT BOARD

Electronic circuit board provides 30 secs ON/OFF blower time delay extracting more heat/cool from the coil. Automotive-style pull fuse protection on the circuit board to provide low voltage and transformer protection.

LOW LEAKAGE CABINET

Sturdy, fully insulated galvanized steel cabinet; stick pins ensure 1/2" insulation remains in place. Unit ships with disposable filter. Less than 1.4% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Unit must be installed according to Aspen installation instructions.

DX COIL

High-efficiency rifled copper tubes and enhanced aluminum fins provide maximum heat transfer. All coils are immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability. Liquid-line Schrader valve allows pre-installation pressure assurance testing.

Available with either check style flowrator or TXV metering device. Field-installable TXVs are also available. Galvanized metal drain pan with bottom primary and secondary drain connections or alternate right side primary. All connections 3/4" NPT. Access door allows for coil cleaning.

MODULAR ELECTRIC HEAT KITS

Heat kits available with either circuit breakers or terminal blocks. Available from 3 to 10 KW. Models with electric heat include sequencers and temperature limit switches for safe, efficient operation. Modules are easily installed in the field using molex plugs or can be ordered factory-installed. Controls are accessible from the front for easy service. Electrical connections can be made from the top or left. Disconnect does not protrude through the wall panel. Fan time delay relay standard for increased efficiency.

WARRANTY One-year limited parts warranty.

OPTIONS Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASD COILS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

OTHER POPULAR CUSTOM OPTION:

Factory or field-installed TXV available.

ACCESS DOOR

VERSATILITY

Equipped with hidden frame feature. Fastens to the outside wall surface and does not have to perfectly match the hole opening. Frame screws are not visible after installation. Available in either solid (S) or louvered (L) style.

MATERIALS

Galvanized steel construction with smooth powder paint finish.

FILTER

20" x 20" x 1" field supplied.

ACCESS PANEL

PES/PET SERIES

- ▶ CASED & UNCASD DX COOL
- ▶ COPPER
- ▶ ELECTRIC

Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Built-in mounting tabs for ceiling or fur down mounting. Louvered ceiling access panel has separate frame that attaches to ceiling joists. Solid access panel available for use with end return installations. Compatible with most brands of air conditioners or heat pumps. Field convertible front and bottom return. Wall hanging bracket included standard.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

240V CONSTANT TORQUE ECM MOTOR

Pre-programmed, 5-speed, 208V/240V ECM motors that ensure higher efficiency and increased energy savings by delivering constant torque during operation. Motors are pre-programmed with speeds and torques at the factory for optimal performance and reliability. Direct drive blowers circulate air quietly and efficiently.

ELECTRONIC CONTROL BOARD

Electronic circuit board provides 30 secs ON/OFF blower time delay extracting more heat/cool from the coil.

LOW LEAKAGE CABINET DESIGN

Sturdy, fully insulated galvanized steel cabinet with knockout for duct return. Less than 2% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Unit must be installed according to Aspen installation instructions.

- **PES SERIES:** Uncased
- **PET SERIES:** Sturdy, fully insulated galvanized steel cabinet with knockout for duct return.

DIRECT EXPANSION COIL

High-efficiency rifled copper tubes and enhanced aluminum fins provide maximum heat transfer. All coils are immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability. Liquid-line Schrader valve allows pre-installation pressure assurance testing.

Available with either orifice or TXV metering device factory installed. Field-installable bolt-on TXVs is also available. Primary & secondary condensate drain. All drain connections are 3/4" NPT. Powder-painted metal drain pan. Access door allows for coil cleaning.

ELECTRIC HEAT KITS

Heat kits available in 3, 5, 6, 8, & 10 KW. Models with electric heat include sequencers and temperature limit switches for safe, efficient operation. Easily accessible controls for quick service.

WARRANTY One-year limited parts warranty.

OPTIONS Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASD COILS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

OTHER POPULAR CUSTOM OPTION:

Factory or field-installed TXV available.

R51341 11/25

ACCESS DOOR

VERSATILITY

Equipped with hidden frame feature. Fastens to the outside wall surface and does not have to perfectly match the hole opening. Frame screws are not visible after installation. Available in either solid (S) or Louvered (L) style.

MATERIALS

Galvanized steel construction with smooth powder paint finish.

FILTER

20" x 20" x 1" field supplied.

ASPENPRO AIR HANDLERS
 CEILING MOUNT

Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Built-in mounting tabs for ceiling or fur down mounting. Louvered ceiling access panel has separate frame that attaches to ceiling joists. Solid access panel available for use with end return installations. Compatible with most brands of air conditioners or heat pumps. Field convertible front and bottom return. Wall hanging bracket included standard.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

240V PSC MOTOR

The 240V PSC Motor features a direct drive, multi-speed blower that delivers quiet and efficient air circulation. A two-speed motor allows for precise airflow selection, while clearly labeled motor terminals make speed adjustments simple and accurate.

The plate-mounted blower assembly enables quick removal for easy service and maintenance. Built for reliability and consistent performance, this motor option is ideal for electric heat applications.

ELECTRONIC CONTROL BOARD

Electronic circuit board provides 30 secs ON/OFF blower time delay extracting more heat/cool from the coil.

LOW LEAKAGE CABINET DESIGN

Less than 2% air leakage from cabinet when installed in enclosure and tested in accordance with ASHRAE 193.

- **PAS SERIES:** Uncased
- **PAT SERIES:** Sturdy, fully insulated galvanized steel cabinet with knockout for duct return.

DIRECT EXPANSION COIL

High-efficiency rifled copper tubes and enhanced aluminum fins provide maximum heat transfer. All coils are immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability. Liquid-line Schrader valve allows pre-installation pressure assurance testing.

Available with either orifice or TXV metering device factory installed. Field-installable bolt-on TXVs are also available. Primary & secondary condensate drain. All drain connections are 3/4" NPT. Powder-painted metal drain pan. Access door allows for coil cleaning.

ELECTRIC HEAT KITS

Heat kits available in 3, 5, 6, 8, & 10 KW. Models with electric heat include sequencers and temperature limit switches for safe, efficient operation. Easily accessible controls for quick service.

WARRANTY One-year limited parts warranty.

ACCESS DOOR

VERSATILITY

Equipped with hidden frame feature. Fastens to the outside wall surface and does not have to perfectly match the hole opening. Frame screws are not visible after installation. Available in either solid (S) or Louvered (L) style.

MATERIALS

Galvanized steel construction with smooth powder paint finish.

FILTER

20" x 20" x 1" field supplied.

RES/RET SERIES

- ▶ CASED & UNCASSED ECM DX COOL
- ▶ ALUMINUM
- ▶ ELECTRIC

Representative image only. Some models may vary in appearance. Cased RET Series air handler shown.

APPLICATION VERSATILITY

Built-in mounting tabs for ceiling or fur down mounting. Louvered ceiling access panel has separate frame that attaches to ceiling joists. Solid access panel available for use with end return installations. Compatible with most brands of air conditioners or heat pumps. Field convertible front and bottom return. Wall hanging bracket included standard.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

240V CONSTANT TORQUE ECM MOTOR

Pre-programmed, 5-speed, 208V/240V ECM motors that ensure higher efficiency and increased energy savings by delivering constant torque during operation. Motors are pre-programmed with speeds and torques at the factory for optimal performance and reliability.

Direct drive blowers circulate air quietly and efficiently. Rail mounted blowers provide easy removal for service and maintenance.

ELECTRONIC CONTROL BOARD

Electronic circuit board provides 30 secs ON/OFF blower time delay extracting more heat/cool from the coil.

LOW LEAKAGE CABINET DESIGN

Sturdy, fully insulated galvanized steel cabinet with knockout for duct return. Less than 2% air leakage from cabinet when tested in accordance with ASHRAE standard 193. Unit must be installed according to Aspen installation instructions.

- RES SERIES: Uncased
- RET SERIES: Cased

DIRECT EXPANSION COIL

High-efficiency rifled aluminum tubes and enhanced aluminum fins provide maximum heat transfer. All coils factory leak tested with two-stage pressure decay and mass spectrometer process, then nitrogen pressurized and factory sealed for maximum reliability.

Available with either orifice or TXV metering device, factory installed. Field-installable bolt-on TXVs are also available. Primary and secondary condensate drain. All drain connections are 3/4" NPT. Power-painted metal drain pan. The access door allows for coil cleaning.

ELECTRIC HEAT KITS

Heat kits available in 3, 5, 6, 8, & 10 KW. Models with electric heat include sequencers and temperature limit switches for safe, efficient operation. Easily accessible controls for quick service.

WARRANTY One-year limited parts warranty.

OPTIONS Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASSED COILS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

OTHER POPULAR CUSTOM OPTION:

Factory or field-installed TXV available.

ACCESS DOOR

VERSATILITY

Equipped with hidden frame feature. Fastens to the outside wall surface and does not have to perfectly match the hole opening. Frame screws are not visible after installation. Available in either solid (S) or Louvered (L) style.

MATERIALS

Galvanized steel construction with smooth powder paint finish.

FILTER

20" x 20" x 1" field supplied.

ASPENPRO AIR HANDLERS
CEILING MOUNT

CASED

UNCASD

Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Built-in mounting tabs for ceiling or furr-down mounting. Compatible with most brands of air conditioners and heat pumps. Optional louvered ceiling access panel has separate frame that attached to ceiling joists. Optional solid ceiling panel available for use with ducted return. Less than 2% air leakage when tested in accordance with ASHRAE standard 193. Field convertible front and bottom return. Wall hanging bracket included standard.

- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance. In accordance to UL 60335 Refrigerant Detection Systems are factory-installed on A2L refrigerant ready air handlers.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L refrigerants certified with Refrigerant Detection System (RDS)).

BLOWER MOTOR

Direct drive blowers circulate air quietly and efficiently. Multiple speeds allow for precise air volume selection. Air moving system is plated mounted to allow for easy removal and service.

ELECTRONIC CONTROLS

- **PBS Series:** Electronic circuit board provides 30 secs ON/OFF blower time delay extracting more heat/cool from the coil.
- **PBT Series:** Electronic board controls the functioning of system, increasing system reliability. Standard factory installed freeze stat wired into circulating pump control circuit. Standard factory installed fan time delay relay for increased efficiency and maximize capacity. Standard factory installed pump cycle timer circulates hot water every four hours to prevent coil freeze and water stagnation during off-cycle. Factory installed service switch

LOW LEAKAGE CABINET DESIGN

Less than 2% air leakage from cabinet when installed in enclosure and tested in accordance with ASHRAE 193. Sturdy, fully insulated galvanized enclosure with ducted return available as option.

DIRECT EXPANSION/HYDRONIC COILS

High-efficiency rifled copper tube and enhanced aluminum fins provide maximum heat transfer. All coils immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability. Liquid-line Schrader valve allows pre-installation pressure assurance testing.

Available with factory installed orifice or TXV. Primary and secondary DX condensate drain with 3/4" NPT connections. Powder-painted galvanized drain pan. Hydronic coils suitable for potable water applications.

WARRANTY One-year limited parts warranty.

OPTIONS Ask your local Aspen Sales Rep for customization options.

DUAL REFRIGERANT

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH ASPEN AIR HANDLERS, AS WELL AS CASED & UNCASD COILS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

OTHER POPULAR CUSTOM OPTION:

Factory or field-installed TXV available.

UPFLOW / DOWNFLOW
MANUFACTURED HOUSING

Representative image only. Some models may vary in appearance.

STANDARD FEATURES

- Rifled copper tubing, enhanced aluminum fins.
- Downflow plates and manufactured housing drain hose and drain elbow included.
- Immersion tested at 500 psi, followed by nitrogen pressurization and factory sealing to ensure optimal system integrity and long-term reliability.
- Left-hand refrigerant/plumbing connections, with downturn suction line for easy installation in manufactured housing applications. Schrader valve provided for pressure assurance testing. Refrigerant and plumbing connections:
 - Liquid line: 3/8" ODS
 - **Suction line:**
 - ▶ 3/4" ODS on 1-1/2-ton to 3-ton
 - ▶ 7/8" ODS on 3-1/2-ton to 5-ton
 - Drain connections:
 - ▶ 195L pans have four (4) drains 3/4" FPT
 - ▶ 177L pans have one (1) LH 3/4" FPT
- Heavy duty polypropylene drain pans.
- ETL listed for R22, R410A, R454B, and R32 refrigerants (A2L Refrigerants certified with Refrigerant Detection System (RDS)).
- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance.
- AHRI certifiable with all brands of A/C and heat pump systems.

WARRANTY

- Ten-year limited warranty with registration.

CUSTOMIZATION OPTIONS

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH BOTH CASED AND UNCASED COILS, PLUS ALL AIR HANDLERS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

CUSTOM OPTIONS:

- Refrigerant Detection System (RDS) kit factory-installed.
 - Factory or field-installed TXV available.

UPFLOW / DOWNFLOW
MANUFACTURED HOUSING

Representative image only. Some models may vary in appearance.

STANDARD FEATURES

- Riffled aluminum tubing, enhanced aluminum fins.
- Downflow plates and manufactured housing drain hose and drain elbow included.
- Multi-stage leak testing at 500 psi pressure decay, mass spectrometer tested with Helium, then Nitrogen pressurized and factory sealed optimal system integrity and long-term reliability.
- Left-hand refrigerant/plumbing connections, with downturn suction line for easy installation in manufactured housing applications. Schrader valve provided for pressure assurance testing. **Refrigerant and plumbing connections:**
 - **Liquid line:** 3/8" ODS
 - **Suction line:**
 - ▶ 3/4" ODS on 1-1/2-ton to 3-ton
 - ▶ 7/8" ODS on 3-1/2-ton to 5-ton
 - **Drain connections:**
 - ▶ 195L pans have four (4) drains 3/4" FPT
 - ▶ 177L pans have one (1) LH 3/4" FPT
- Heavy duty polypropylene drain pans.
- AHRI certifiable with all brands of A/C and heat pump systems.
- ETL listed for R22 and R410A. ETL listed for R454B and R32 with Refrigerant Detection System (RDS).
- A2L refrigerants require a Refrigerant Detection System (RDS) for compliance.

WARRANTY

- Ten-year limited warranty with registration.

CUSTOMIZATION OPTIONS

UNIVERSAL A2L REFRIGERANT TECHNOLOGY FOR R32 & R454B SYSTEMS

IDEAL FOR USE WITH BOTH CASSED AND UNCASSED COILS, PLUS ALL AIR HANDLERS!

Versa Dual Refrigerant Coils are easily configurable for use with either R32 or R454B refrigerant with proper metering device. Utilizing universal Refrigerant Detection Systems (RDS) to ensure regulatory compliance.

CUSTOM OPTIONS:

- Refrigerant Detection System (RDS) kit factory-installed.
 - Factory or field-installed TXV available.

AE(D/U)-(S/L) SERIES ▶ ONE-PIECE ▶ ELECTRIC

UPFLOW / DOWNFLOW - FURNACES
MANUFACTURED HOUSING

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

Designed for the manufactured home market with flexibility in mind. One unit for all, Downflow (Front Return) or Upflow (Bottom Return) as shipped (field-convertible for downflow (front and top return) and downflow (top return)). Can also be field configured to opposite configuration with the proper conversion kit. (Kits sold separately). 1.5 – 5 tons of cooling or heating airflow with a range of electric heat kits.

240V CONSTANT TORQUE ECM MOTOR

Pre-programmed, 5-speed, 208V/240V ECM motors that ensure higher efficiency and increased energy savings by delivering constant torque during operation. Motors are pre-programmed with speeds and torques at the factory for optimal performance and reliability. Direct drive blowers circulate air quietly and efficiently. Rail mounted blowers provide easy removal for service and maintenance.

ELECTRONIC CIRCUIT BOARD

Electronic circuit board provides 30 secs ON/OFF blower time delay extracting more heat/cool from the coil. Automotive pull-style fuse integrated into board for easy diagnosis and replacement of fuse.

CABINET

Sturdy, galvanized steel cabinet with painted front panels. Cabinet fully insulated with 1/2" micro mat non-hygroscopic insulation to prevent sweating, encapsulate glass fibers, and to provide excellent R-value. Mechanical fastening ensure insulation remains in place.

BLOWER

Direct drive blowers circulate air quietly and efficiently. Blowers mounted on rails so they can be easily removed for service.

MODULAR ELECTRIC HEAT KITS

Heat kits available with either circuit breakers or terminal blocks. Available from 3 to 20 KW. Models with electric heat include sequencers and temperature limit switches for safe, efficient operation. Modules are easily installed in the field using molex plugs or can be ordered factory-installed. Controls are accessible from the front for easy service. Electrical connections can be made from the top or left. Disconnect does not protrude through the wall panel. Fan time delay relay standard for increased efficiency.

WARRANTY Five-year limited parts warranty with registration.

OPTIONS Ask your local Aspen Sales Rep for customization options.

AE(D/U) BENEFITS & ENHANCEMENTS:

- One piece cabinet, reducing time and effort when field converting airflow orientation. Unit is convertible to either orientation with the correct door/ accessories.
- Reduced air handler weight.
- Heat kits available in both field and factory installation kits.
- AEU/D-S & AEU/D-L one-piece cabinet design fits up to a 27.5 tall coil.
- Electrical access from both sides of the cabinet.
- More room in cabinet for larger coils, as energy efficiencies increase, while maintaining overall cabinet dimensions.
- Rail-mounted blower assembly easily removed for service.
- Redesigned control panel for enhanced interface to wiring and components.
- Sloped coil shelf for optimal condensate management.

AEN SERIES ▶ TWO-PIECE ▶ ELECTRIC

Unit shown with service panels removed. Representative image only. Some models may vary in appearance.

APPLICATION VERSATILITY

One model that delivers 2 to 5 tons of cooling or heating airflow. Upflow (with MAD coil box) and downflow applications. Can be installed in closet and alcove.

240V CONSTANT TORQUE ECM MOTOR

Pre-programmed, 5-speed, 208V/240V ECM motors that ensure higher efficiency and increased energy savings by delivering constant torque during operation. Motors are pre-programmed with speeds and torques at the factory for optimal performance and reliability. Direct drive blowers circulate air quietly and efficiently. Motor speeds and torques programmed in the motor. Blowers mounted on rails so they can be easily removed for service.

ELECTRONIC CIRCUIT BOARD

Electronic circuit board provides 30 secs ON/OFF blower time delay extracting more heat/cool from the coil. Automotive pull-style fuse integrated into board for easy diagnosis and replacement of fuse.

CABINET

Sturdy, galvanized steel cabinet with painted front panels. Cabinet fully insulated with 1/2" micro mat non-hygroscopic insulation to prevent sweating, to encapsulate glass fibers, and to provide excellent R-value. Stick pins ensure insulation remains in place.

BLOWER

Direct drive blowers circulate air quietly and efficiently. Blowers mounted on rails so they can be easily removed for service.

MODULAR ELECTRIC HEAT KITS

Heat kits available with either circuit breakers or terminal blocks. Available from 3 to 20 KW. Models with electric heat include sequencers and temperature limit switches for safe, efficient operation. Modules are easily installed in the field using molex plugs or can be ordered factory-installed. Controls are accessible from the front for easy service. Disconnect does not protrude through the wall panel.

WARRANTY Five-year limited parts warranty with registration.

ORDERING TERMS

REQUIRED INFORMATION

To ensure accuracy, the following information must be included with every order.

- **Company Name**
- **Contact phone number**
- **Contact Email Address**
- **Account Number and Purchase Order Number**
- **Requested Ship Date (if not indicated, the order will be placed and shipped ASAP)**

Complete Model Numbers – including Option Codes:

- If standard equipment, please fill the space with 000
- For access doors, specify “L” for louvered or “S” for solid, where applicable.

All notes regarding special pricing, terms, shipping, etc. (include supporting documents, such as factory quote)

SEND ORDERS TO:

PHONE ORDERS AND FOX ORDERS ARE NOT ACCEPTED. Send parts quote requests, order status requests, and other informational requests here: info@aspenmfg.com.

TO CONTACT THE CUSTOMER SERVICE TEAM BY PHONE:

281-441-6500 (Dial 1 for Customer Service) or 800-423-9007

FOR PURCHASE ORDERS:

It is important to us that we confirm receipt of every purchase order received and we enter your purchase order in a timely manner. To help us ensure we have received your purchase order, we kindly ask that all purchase orders be sent directly to our Order Entry Team at orderentry@aspenmfg.com, rather than directly to your local sales representative or any other Aspen employee. We do encourage you to cc: your local sales representative on any email sent to our Order Entry Team.

Once we receive your purchase order (new ones and revisions), you will receive and “order receipt” email from OrderEntry@AspenMFG.com, to simply let you know it was received.

Even if we have an issue with the purchase order sent in, you will receive an email letting you know about the issue and what is required to move forward.

If you do not receive a return email with a copy of your purchase order, it likely means we did not receive your purchase order.

PLEASE SAVE THE ORDERENTRY@ASPENMFG.COM EMAIL ADDRESS AS THE PRIMARY ADDRESS FOR SUBMITTING ALL PURCHASE ORDERS TO ASPEN MANUFACTURING.

FOR PARTS:

It is helpful to production if you reference the original model number and the serial number of the equipment associated with the part you are ordering. Parts (such as pistons, TXVs, drain pans, etc.) ordered with equipment (air handlers/coils) will have the same lead time as the equipment. If you need the parts sooner, ordering them on a separate purchase order is best. For drain pans, coil assemblies, blower assemblies, and blower motors, the information is required. Please make sure this information is on your purchase order. We cannot process your Purchase Order without it.

EQUIPMENT ORDERS

The minimum order quantity is fifty units. The minimum line-item quantity is one pallet.

ORDERING SERVICE PARTS

When ordering the following **SERVICE PARTS**, we require the COMPLETE model number **and** the serial number of the associated equipment. This is a requirement of production. We cannot process your order without this required information.

PLEASE MAKE SURE IT IS REFERENCED ON YOUR PURCHASE ORDER FOR ANY OF THE FOLLOWING PARTS.

- Blower Motor
- Blower Housing/Wheel
- Blower Assembly
- Drain Pan
- Coil Assembly (Replacement Coil for Air Handler)

Send parts quote requests, order status requests, and other informational requests here: info@aspenmfg.com.

TECHNICAL SUPPORT

Send email our Technical Support team to: techsupport@aspenmfg.com.

TO REACH OUT VIA PHONE PLEASE CALL: 281.441.6500 (Dial 3 for Technical Support) or 800.423.9007

WARRANTY

Send email concerning warranty status requests and claim inquiries here: warranty@aspenmfg.com.

TO REACH OUT VIA PHONE, PLEASE CALL: 281-441-6500 (Dial 2 for Warranty) or 800-423-9007

WHO TO CONTACT

For any additional questions or information, please use the following email contacts.

- **WARRANTY TEAM:** warranty@aspenmfg.com

CONTRACTOR

If you're a contractor or installer looking to purchase one of our products please contact your local HVAC Distributor.

HOMEOWNER

Aspen Manufacturing does not employ heating and cooling technicians who come out to repair HVAC equipment and we do not have factory-authorized contractors. We rely strictly on independent heating and cooling professionals in your area to install, maintain & troubleshoot our products. If you are a home-owner or consumer, contact the heating or cooling professional who installed your equipment or a local HVAC professional in your area for service.

TERMS & CONDITIONS

APPLICABILITY: These terms and conditions (“Terms”) apply to all sales of products by Aspen Manufacturing (“Aspen”) and the performance of any services by Aspen to the buyer designated in the attached quotation or order confirmation. No other terms apply, and all other terms included in any documents provided by buyer (or otherwise alleged by buyer to apply) are expressly rejected. If these Terms are included in an order confirmation, then such confirmation is not an acceptance of buyer’s terms but is a counteroffer expressly conditioned on acceptance of these Terms without additional or conflicting terms. Any modification or waiver of any of these Terms must be in writing signed by the parties.

PAYMENT TERMS: Payment terms are 1% 10 days, net 30 days from invoice date. A daily finance charge of 1-1/2% or the maximum allowed by law will be assessed on all past due amounts. All orders are subject to a minimum \$50 billing. All orders payable in US funds.

FREIGHT TERMS: All shipments of merchandise are F.O.B. Humble TX. Aspen orders for \$20,000 or more of merchandise will be shipped freight prepaid to any one destination in the continental U.S. or Canada. Aspen orders for less than \$20,000 of merchandise, and all AspenPro orders, will be shipped freight prepaid and added to invoice. “Will Call” orders for Aspen and AspenPro will not be assessed freight charges, regardless of size.

FREIGHT CHARGES: All accessorial charges assessed by the freight company, including drop charges, detention charges, lift gate charges, etc., will be passed on to the buyer.

DROP SHIPMENTS: There is a three-drop limit per truckload, with a 4-pallet minimum per drop.

POOLING ORDERS: For the purposes of determining freight charges, each purchase order will be evaluated individually. Pooling of orders, whether from the same customer or different customers, in order to qualify for prepaid freight will not be allowed. Aspen will group orders together whenever possible in order to minimize freight charges. Doing so will not incur future obligation.

METHOD OF SHIPMENT: The method of shipment is at the discretion of Aspen. If special routing is requested, Aspen will charge for the difference between such routing and normal minimum freight charge to such point.

BUYER DELAYED DELIVERIES: Product shipment cannot be delayed beyond a requested or agreed to delivery date once production has begun. If buyer cannot or will not accept delivery as scheduled, Aspen will charge a storage fee of \$250.00 per day for each truckload or partial truckload that remains in Aspen’s shipping facility. Buyer agrees to promptly direct such merchandise to be shipped to a secondary location, if possible, in order to minimize such charges.

BACKORDERS: Backorders will be shipped according to the freight terms of the original order.

WARRANTY: Aspen warrants all merchandise is accordance with its standard product warranties, copies of which are available on request. Aspen’s warrant varies according to product. Buyer should consult the warranty documents relevant to the products he is purchasing. ALL OTHER WARRANTIES ARE EXPRESSLY DISCLAIMED.

ORDER AND LINE-ITEM MINIMUMS: The minimum order quantity is fifty units. The minimum line-item quantity is one pallet.

RECEIPT OF SHIPMENT: Risk of loss of merchandise sold by Aspen transfers to buyer when Aspen tenders such merchandise to the carrier for delivery to buyer or its designee. Aspen’s Bill of Lading is acknowledgment by the freight carrier that they have accepted the shipment in good condition. Responsibility for shipment is the carrier’s. Damaged merchandise must be reported to the carrier directly by the buyer. The buyer should insist that such damages are itemized on the freight bill. Deductions for damage will not be allowed, Aspen’s responsibility ends with consignment of product to the carrier. If there are shortages, they should be noted on the freight bill and the carrier should be notified immediately. Aspen must receive notification of shortages within 24 hours of receipt of shipment.

RETURN POLICY: No merchandise will be accepted for return: all sales are final. If an exception is made by Aspen to allow return of goods, credits for new material accepted for return will be at the original sales price or current market price, whichever is lower, less handling and restocking charges of 25%. Buyer must prepay all return transportation charges. No goods will be accepted for return more than six months after shipment unless expressly allowed by Aspen. Obsolete products or products made to special order are not returnable.

ORDER ACCEPTANCE: All orders must be in writing and are subject to acceptance by Aspen. A purchase order number must appear on all orders. No agent, salesman, or other representative, has an authority to waive alter or enlarge these standard terms, unless authorized in writing by an officer of Aspen.

CHANGE ORDERS: Change orders are only allowed at Aspen’s discretion, change orders cannot be accepted after two-weeks from Purchase Order acceptance or order enters production whichever occurs earlier.

ORDER CANCELLATION: Orders are non-cancellable after two-weeks of Purchase Order acceptance by Aspen. All orders are considered in-production two-weeks following Purchase Order acceptance. No cancellations or modifications to orders will be accepted after production starts.

CREDIT APPROVAL: If, during the performance hereof, the financial responsibility of buyer is determined at the sole discretion of Aspen’s Credit Department to be unacceptable or if buyer fails to make any payments in accordance with the terms hereof, Aspen may defer or decline to make any shipments hereunder except upon receipt of Cash payments in advance, or Aspen may terminate this order without further obligation of Aspen to buyer.

TAXES: Any direct or excise tax which may now or hereafter be imposed by federal or state government or any subdivision thereof or other governmental authority upon the manufacture, sale or delivery of the goods covered by this order may be added by Aspen to the purchase price of such goods, and if so added, shall be paid by the buyer.

CREDITS: Accounting credits expire one year from date of issuance. Credits can only be applied toward the purchase of Aspen equipment (not parts). Cash reimbursement for credits in lieu of equipment purchases is not allowed.

DELIVERY DATES: Any delivery dates, which may be indicated, are estimates only and are not guaranteed. Buyer's requested delivery date is an approximation and subject to Aspen's acceptance. Aspen has the right to change, modify, extend, etc. any and all delivery dates.

PROPERTY DAMAGE: In case of product failure resulting in property damage, Aspen warranty department should be contacted immediately. No corrective action should be taken without prior written authorization from Aspen.

PRODUCT CHANGES: Aspen reserves the right to change specifications, design and material in the interest of product improvement, without incurring obligation to the buyer.

FORCE MAJEURE: Aspen is not liable for delays or defaults in performance when due to acts of God, including fire, floods, wind, storm, labor disorders, strikes, work stoppages or other labor trouble, accidents, riots, civil commotion, terrorist acts or threats, closing of the public highways, Government acts or policies and other contingencies beyond the reasonable control of Aspen.

GOVERNING LAW: These Terms and all sales of products by Aspen and the performance of any services by Aspen to the buyer, and any disputes arising in connection therewith, are governed by the laws of the state of Texas, excluding its conflicts of laws provisions, and the parties submit to exclusive jurisdiction in the federal or state courts located in Harris County, Texas for resolution of all such disputes, and agree that venue is proper and convenient in such forum. These Terms shall not be governed by the United Nations Convention of Contracts for the International Sale of Goods, the application of which is expressly excluded.

LIMITATIONS: IN NO EVENT SHALL ASPEN BE LIABLE TO BUYER OR ITS AFFILIATES OR CUSTOMERS FOR INCIDENTAL, SPECIAL, EXEMPLARY, PUNITIVE, OR CONSEQUENTIAL DAMAGES, SUCH AS LOST PROFITS AND LOST BUSINESS OPPORTUNITIES, EVEN IF SUCH DAMAGES WERE REASONABLY FORESEEABLE AND EVEN IF NOTICE WAS GIVEN OF THE POSSIBILITY OF SUCH DAMAGES.
