

ANY ROOM,
ANY SEAS^oN

Single-Zone Efficiencies up to: 33 SEER / 14.2 HSPF

Multi-Zone Efficiencies up to: 19.7 SEER / 10.3 HSPF

A Year-Round Solution

Revolutionary mini-split heat pumps provide both heating and cooling for year-round comfort in most climates. A simple push of a button on the remote control allows you to switch from heating to cooling (or vice versa) automatically.

*Savings may vary based on model selected, hours of operation and geographical location. Example given based on 33-SEER system versus 14-SEER system.

The new degree of comfort.®

YEAR-ROUND, WHOLE-HOME OR BUSINESS ENERGY EFFICIENT HEATING AND COOLING

WHAT IS A MINI-SPLIT?

Mini-Splits are ductless systems that eliminate the need for a basement or attic-located evaporator unit and ductwork by using thin copper tubing that pumps refrigerant directly to discreet wall mounted units inside. Even more remarkable, this same unit works in reverse in winter, absorbing heat from the outside air and moving it indoors to heat your home. The result? Efficient cooling and heating for year-round, whole-home comfort in most climates.

Available in numerous mix-and-match capacities, Rheem® offers a mini-split system for even the most difficult to heat and cool areas.

HOW DOES A MINI-SPLIT WORK?

Like your refrigerator, heat pumps use electricity to pump refrigerant and transfer heat from one space to another. Heat pumps transfer heat from the outdoors to within the home.

INDIVIDUAL ZONING: PERSONALIZED WHOLE HOME COMFORT

MULTI
18, 24, 36,
45,000 BTUs

Ductless Heat Pump Mini-Split systems are some of today's most advanced forms of heating and cooling. One outdoor unit can operate up to 5 indoor units, simultaneously providing just the right amount of comfort control to each zone. Rheem systems are super quiet as well as highly energy efficient.

- Each indoor unit can:
- Operate independently via remote control
 - Supply both heating and cooling (not simultaneously)
 - Provide high energy efficiencies
 - Operate quietly

WALL MOUNTED

The mini-split indoor unit mounts high on a wall, out of sight and does not require ductwork, increasing energy efficiency.

SLIM DUCT

Mounted in a ceiling or in a framed enclosure below a ceiling. They use minimal ductwork and remain very energy efficient.

- Concealed and out of sight
- Look of central air with the efficiency of a mini-split
- Less ducts = higher efficiency

FLOOR MOUNTED

Floor mount systems are ideal for residential radiator replacements or any room with limited upper wall space, like a kitchen or sunroom.

- Compact size fits easily under a standard window
- Features twin airflow for improved heat delivery and help those cold feet
- Designer wireless remote control

COMPACT CASSETTE

Cassettes are extremely discreet, with only the grille showing in the ceiling. They use the latest fan technology to distribute the conditioned air evenly.

- Wired remote control (wireless is optional)
- Powerful turbo fan operation
- Fits into a standard 2' x 2' ceiling grid

HEAT PUMPS PROVIDE HEAT WHEN IT'S CHILLY

Because refrigerant is naturally much colder than outdoor temperatures even on a very cold day, it actually absorbs heat from outdoors, and transfers the heat to within your home. The refrigerant's physical properties do this naturally. What you provide is the electricity to pump refrigerant via refrigerant lines from outdoors to indoors. Because it moves heat rather than creating it, it can deliver up to 4 times the heat for the energy consumed.

HEAT PUMPS PROVIDE COOLING WHEN IT'S WARM

Come spring and summer, simply reverse the process by putting the same system into "cooling mode" to transfer heat from indoors to the outside.

ELECTRIC HEATERS VS. HEAT PUMPS

An electric heater converts electricity directly to heat, assuming that the heat loss is zero, the output from one kilowatt input is one kilowatt or 3,400 BTU/HR and the EER is 3.4.

Heat pumps are more efficient than some other forms of heating because they do not actually create heat—they just move it from one place to another. For example, the output of an efficient 10 EER heat pump is triple that of an electric heater at 10,000 BTU/HR.

*EER (Energy Efficiency Rating) = Rated BTU/HR capacity divided by total kW input.

A SOLUTION FOR ALL OF YOUR COMFORT NEEDS

DUCTLESS TECHNOLOGY

Rheem® Mini-Split Systems offer a convenient alternative in areas of the home where traditional duct systems may not be an option—such as attics, home additions, basements or crawlspaces. Since mini-splits have no ducting, they set up quickly, install easily and won’t take up closet or attic space. Used in conjunction with a new Rheem HVAC system, our high-efficiency ductless systems make it easy for you to keep spaces more comfortable and energy consumption low, while saving big on utility costs.

WHOLE HOME OR BUSINESS COMFORT

Rheem Ductless Mini-Split Systems provide home and business owners just the right amount of heating and cooling needed by installing 1 to 5 indoor units connected to one outdoor unit. Indoor units vary by size and each creates its own “zone” of comfort, allowing you to heat or cool individual rooms, hallways and open spaces.

A YEAR-ROUND SOLUTION

Revolutionary heat pumps provide both heating and cooling for year round comfort in most climates. A simple push of a button on the remote control allows you to switch from heating to cooling (or vice versa) automatically.

Whole Home Comfort

Multi-zone systems provide homeowners just the right amount of heating and cooling needed by installing 2 to 5 indoor units connected to one outdoor unit. Indoor units vary by size and each creates its own “zone” of comfort, allowing the heating or cooling of individual rooms, hallways and open spaces.

ENERGY EFFICIENT: THE SMART CHOICE IN COMFORT

Heating and cooling consume as much as half of the energy used in your home. So, making smart decisions about your home’s heating and cooling system can have a big effect on your utility bills—and your comfort.

WHERE DOES MY MONEY GO?

The high energy efficiencies of ductless mini-split systems slash utility bills by up to 25%. If your average annual utilities are \$4,200, Rheem® can save you up to \$1,050 annually or \$10,500 over 10 years!*

*Savings may vary based on model selected, hours of operation and geographical location. Example given based on 33-SEER system versus 14-SEER system.

REBATES

To encourage customers to buy energy efficient products, many local utility companies offer significant rebates for the purchase of a ductless mini-split system. Check with your utility provider or Rheem.com/Rebates.

ENERGY STAR® QUALIFIED SYSTEMS*

Is your HVAC equipment more than 10 years old and making your house uncomfortable? Then, call a professional HVAC contractor for an evaluation. If it is not performing efficiently or needs upgrading, consider replacing it with a unit that has earned ENERGY STAR® qualification. Installed correctly, high-efficiency heating and cooling systems can save up to 25% on utility costs.

ENERGY STAR® Criteria:
SEER ≥ 15.0 EER ≥ 12.5 HSPF ≥ 8.5

*Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate indoor components to meet ENERGY STAR criteria. Ask your contractor for details or visit EnergyStar.gov.

COMFORT AND CONVENIENCE

QUIET

Rheem® believes heating and cooling systems should be felt—not heard. Rheem Ductless Mini-Split Systems are so quiet you won't even know they're on. You can sleep well at night in a comfortable, peaceful environment. Also, our wall mount units feature Quiet Mode—extra-quiet fan speed to ensure you are not disturbed.

CONSTANT COMFORT THROUGH INVERTER TECHNOLOGY

Inverter technology found in Rheem Mini-Splits is like cruise control for your heating or cooling system. Compressors only run as fast as they need to handle the cooling or heating demand. They can handle greater extremes in temperature, are smoother and more stable in operation, and reach the desired temperature more quickly than conventional heat pumps.

Inverter Benefits

- More heat at lower outdoor temperatures
- Lower RPMs = quieter operation
- Desired temperature in half the time
- Stable temperature

Conventional System

Inverter System

USER-FRIENDLY CONTROL

Rheem is using ergonomics to expand the use of user-friendly designs such as easy-to-read large LCD displays, easy-to-operate buttons, and displays with easily recognizable colors and icons. These control systems provide greater convenience with operability suitable for the application.

APPLICATIONS

Where can Rheem® Mini-Splits be used?

- Convenience stores
- Fast food chains
- Fire houses
- Police stations
- Oil rigs
- Bars
- Sunrooms and additions
- Warehouses
- Nursing homes
- Small offices
- Older homes
- New construction homes
- Schools
- Places of worship
- Hospitals and medical facilities
- Restaurants
- Computer rooms
- Hotels and motels
- Car washes
- ATM vestibules

Just about any place that requires comfort!

LOW TEMPERATURE HEATING OPERATION

NOT ALL HEATING SYSTEMS ARE CREATED EQUAL
Without the right technology, a system won’t work when its needed most.

PROTECTION FROM WINTER'S COLDEST TEMPERATURES

When the temperature drops you don’t want to be left in the cold. It’s important to choose a heat pump system rated for the climate you live in. If your system doesn’t operate in severe conditions you and your family could be left without any heat at all.

Rheem’s line of mini-split heat pumps come in different sizes, styles, and rated outdoor temperatures. The Low Temperature Heating Operation Series features outdoor condensing units engineered to operate in temperatures down to -15°F.

HIGH PERFORMANCE HEATING

Rheem® low temperature heating operation units feature large heat exchangers and high capacity compressors. This gives our low temperature heating operation heat pumps the ability to extract heat even at very low outdoor temperatures. For example, at an indoor setpoint of 70°F, all AHHJ and AFFHJ models can deliver 100% or more of their rated heating capacity down to 3°F. All low temperature heating operation models also offer superior heating performance down to -15°F outdoor temperatures.

Rheem Low Temperature Heating Operation systems do not have a low temperature lockout, continuing to heat even below -15°F as conditions allow.

METAL FAN GUARD

While other models have a plastic fan guard, Low Temperature Heating Operation models use metal, which is most capable of withstanding the colder elements.

Without the right technology, condensate freezes to the bottom of the unit and reduces its efficiency and heating output.

IMPROVED HEATING CAPACITY

Heating capacity at low outdoor temperatures was improved by adopting a large heat exchanger and a high capacity compressor.

BASE PAN HEATER

- Equipped with a heater that prevents condensate from freezing
- Contoured base design discharges melted water through drain holes.
- Without a heater, freezing condensate can cause noise, damage to fan blade, condenser, and system performance.

FEATURE EXPLANATION

ENERGY SAVING

- SEER**
Seasonal Energy Efficiency Rating. Used to express efficiency of an AC or heat pump. A higher rating means more efficient.
- HSPF**
Heating Seasonal Performance Factor, measures the efficiency of heating portion of your heat pump.
- Economy Mode**
Thermostat setting automatically changes according to the temperature to avoid unnecessary cooling and heating.
- Energy Saver**
Keeps room cool enough for comfort by using a relaxed thermostat setting reducing power consumption.
- Energy Saving Program (ESP)**
If a space is left without turning the unit off, ESP knows that it is unoccupied and 20 minutes later, temperature is adjusted accordingly until users return to the room. Function is disable in multi-zone installations.
- ENERGY STAR® Qualified**
Qualified products and practices help you save money and reduce greenhouse gas emissions by meeting strict energy efficiency guidelines set by the U.S. Environmental Protection Agency and the U.S. Department of Energy.
- Minimum Heat Mode**
Sets room temperature to 50°F, keeping temperatures above freezing and reducing power consumption.

COMFORT

- Auto Changeover (heating to cooling or vice-versa)***
Automatically alternates between heating or cooling if the room temperature falls 4°F below the set temperature when cooling or rises 4°F above set temperature when heating.
- Auto Fan Mode**
System starts in high fan speed and automatically adjusts downward as room begins to reach set temperature.
- Auto Louver: 4 Way**
Redirects airflow automatically with up / down and left / right motion.
- Auto Louver: Up / Down**
Redirects airflow automatically with seven position up and down motion which can be set to auto swing.
- Auto Restart**
Following a power failure, systems will automatically restart in the same operating mode as before, once power has been restored.
- Dry Mode**
This mode gives priority to reducing the level of humidity in the room, in conjunction with lowering the temperature.
- Fresh Air Intake**
Outside air can be introduced by attaching field supplied flexible duct to fresh air knockouts.
- Outdoor Unit Low Noise+**
Limits compressor and fan speed during high speed operation for noise reduction purposes.
- Powerful Operation**
20 minutes of continuous operation at maximum airflow and maximum compressor speed. Rapid cooling and heating makes the room comfortable quickly.
- Quiet Mode (Indoor Unit)**
An extra quiet fan speed to make sure you are not disturbed.

+ Function is bypassed during defrost and at low speed operation. This feature may limit cooling /heating capacity during high / low ambient conditions and increase energy consumption as system may need to operate longer due to reduced compressor speed.

* Auto Changeover is not designed to provide rapid changes between heating and cooling operation or simultaneous heating and cooling. This feature is not recommended for systems with more than one indoor unit unless all indoor units have similar heating and cooling requirements and have similar temperature set points. If all indoor units have similar heating and cooling requirements and have similar temperature set points, auto changeover will work.

CONVENIENCE

- 24 Hour Timer**
Allows for one on / off cycle during a 24 hour period.
- Sleep Timer**
Automatically adjusts the temperature while you sleep to make you more comfortable.
- Weekly Timer**
Allows you to set on / off time twice a day and a different on / off time by day.

PERFORMANCE

- Apple Catechin Filter (polyphenol ingredient from apples)**
Dust, mold spores and microorganisms are absorbed onto the filter by static electricity and growth is inhibited. 3-12 month life expectancy.
- Cold Prevention**
Indoor coil will warm prior to fan operating, preventing cold air during heating mode.
- Expanded Heating Performance**
Delivers 100% of rated heating capacity at +5°F (-15°C).
- High Ceiling Mode**
Temperature at the top of a high ceiling room may be warmer than the space occupied; this mode adjusts for this difference.
- Ion Deodorizing Filter**
Deodorizes by decomposing absorbed odors using the oxidizing and reducing effects of ions generated by fine ceramic particles. 3 year life expectancy. Wash to restore surface action.
- Pump Down Operation**
Collects all refrigerant in system back into the outdoor unit when the unit is to be moved or before servicing the refrigerant circuit.
- Remote Temperature Sensor**
Room temperature sensor is located in optional wired remote control only.
- Third Party Device Control**
Turns system on or off using a normally closed circuit. Interface with third party devices such as home automation.
- 0°F Low Ambient Cooling**
Can operate in cooling mode with outdoor temperatures as low as 0°F. Operation outside of factory specification is not recommended.
- 5°F Low Ambient Cooling**
Can operate in cooling mode with outdoor temperatures down to -5°F. Operation outside of factory specification is not recommended.

INSTALLATION

- Base Pan Heater**
Prevents condensate from freezing on the outdoor unit.
- Blue Fin Heat Exchanger**
Blue fin treatment to the outdoor unit's heat exchanger improves corrosion resistance.
- Built-In Condensate Pump**
Integrated into the indoor unit.
- Daisy Chain**
Ability to connect up to 16 identical style indoor units to one wired remote.
- Long Piping Length**
Long piping lengths between indoor and outdoor units provides flexibility and increased applications.
- Slender Fit**
Cassette body can be moved downward into the room 1-3/8" to accommodate limited ceiling space.

¹Compact Cassette Grille RXCCGF shown is sold separately and must be ordered with each Compact Cassette model. ²If ROMH36AFXZJ is paired with two 18,000 BTU indoor units, you have to purchase optional kit Part #K9FZ1818.

SINGLE-ZONE DUCTLESS MINI-SPLIT SYSTEMS

Making the hottest places cool
and the coolest places more comfortable

- Extensive lineup from 9,000 to 48,000 BTU
 - 38 different systems available in 7 indoor unit styles
 - Energy efficient systems with SEER ratings as high as 33.0 and HSPF as high as 14.2
 - 26 ENERGY STAR® qualified systems
- Inverter Technology is used in all systems
 - All systems feature environmentally friendly R410A refrigerant
 - Quiet operation with indoor units as low as 21dB and outdoor units as low as 47dB

9, 12, 15,000 BTU/HR WALL MOUNT HEAT PUMPS

¹Available only with optional wired Remote Control and optional interface kit.
²Available only with optional interface kit. Operation monitoring and On / Off control only.
³Low temperature heating operation models only

ENERGY SAVING PROGRAM

These Rheem® systems know how to save you money even when you forget. If you leave the room without turning the unit off, ESP knows that you left and 20 minutes later, set temperature is increased by 4°F when cooling and reduced by 8°F when heating. When you come back to the room, it returns to previous operating mode. This prevents wasteful operation to save energy without you having to think about it. This feature can be deactivated if chosen.

OPTIONAL ACCESSORIES

- Wired Remote Control: RXRVNUM
- Wired Remote Control: RXRNNUM
- Simple Remote Control: RXRSNUM
- Interface Kit: RXTWBXF1
- Dry Contact Wire Kit: RXXWZXZ5

HIGH PERFORMANCE HEATING

The AHWJ model can operate down to -5°F. The AHHJ can operate down to -15°F. See the full low temperature heating operation story on page 12.

9 AND 12,000 BTU/HR WALL MOUNT HEAT PUMPS

¹Available only with optional wired remote control.
²Available only with optional wired remote control and optional interface kit.
³Available only with optional interface kit. Operation monitoring and On / Off control only.

BUILT IN FILTRATION

LONG-LIFE ION DEODORIZATION FILTER
The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine particle ceramic. The filter can be used for approximately 3 years if it is washed with water when dirty to restore its surface action.

APPLE CATECHIN FILTER
Dust, mold spores and micro-organisms are absorbed onto the filter by static electricity and growth is inhibited and deactivated. Filter lasts 3-12 months.

OPTIONAL ACCESSORIES

- Wired Remote Control: RXRVNUM*
 - Wired Remote Control: RXRNNUM*
 - Simple Remote Control: RXRSNUM*
 - Dry Contact Wire Kit: RXXWZXZ5
 - Interface Kit: RXXCBXZ2
- *Wall mounted RIWH09, 12AVFJ require accessory interface kit #RXXCBXZ2 in order to connect these devices to them.

18 AND 24,000 BTU/HR WALL MOUNT HEAT PUMPS

¹AXFWJ systems only.
²AXFWJ systems require optional wired remote control.
³Available only with optional wired remote control.
⁴Available only with optional Interface kit. Operation monitoring and On / Off control only.
⁵AHXHJ models only.

HIGH PERFORMANCE HEATING CAPACITY

Stay comfortable at low ambient temperatures! The AXFWJ systems can deliver 100% or more of rated heating capacity at 5°F (-15°C) and operates down to -5°F (-21°C).

The AHXHJ model can operate down to -15°F. See the full Low Temperature Heating Operation story on page 12.

OPTIONAL ACCESSORIES

- Wired Remote Control: RXRVNUM
- Wired Remote Control: RXRNNUM
- Simple Remote Control: RXRSNUM
- Dry Contact Wire Kit: RXXWZX

30,000 BTU/HR WALL MOUNT HEAT PUMP

¹Available only with optional wired remote control.
²Available only with optional Interface kit.

EXTENDED LINESET

Long piping lengths between indoor and outdoor units provides flexibility and increased applications.

SERVER ROOM MODE

Server rooms can generate a tremendous amount of heat, and require cooling 24 hours a day. The strain of such a heat load is best handled with a redundant cooling system. Pairing two 30AHXHJ systems together in Server Room Mode offers a unique solution for keeping network servers cool.

Two 30AHXHJ systems can be set up to work together in Lead Lag[^] operation:

- Alternative Operation – units alternate operation, so neither unit is running at the same time.
- Backup Operation – if an error occurs on one unit, the second unit will turn on.
- Supporting Operation – if the setpoint cannot be reached with one unit alone, the second unit will come on to satisfy the demand for cooling.

[^]Wired remotes cannot be used when using this feature.
This includes RXRNRUZ1, RXRVNUM, RXRNNUM, RXRSNUM.

LOCK OUT FUNCTION

This feature is set by the contractor on behalf of the Commercial Property Owner to prevent either Cooling or Heating operation from occurring. This is not a function that can be set by a tenant, user, or homeowner.

HIGH PERFORMANCE HEATING CAPACITY

The AHXHJ model can operate down to -15°F. See the full Low Temperature Heating Operation story on page 12.

ADDITIONAL APPLICATIONS THAT MAY REQUIRE LOW AMBIENT COOLING

- Conference / Meeting / Training Rooms
- Social Gathering Spots
- Places of Worship

OPTIONAL ACCESSORIES

- Wired Touch Panel Remote Controller: RXRNRUZ2[^]
- Wired Remote Control: RXRVNUM[^]
- Wired Remote Control: RXRNNUM[^]
- Simple Remote Control: RXRSNUM[^]
- Dry Contact Wire Kit: RXXWZX
- Interface Kit: RXXCSXZ1
- Interface Kit Box: RXGXXB

*Based on model # capacity class (e.g. 09AHWJ based on 9,000 BTU/HR) @ 70°F indoor setpoint. Refer to the Design & Technical Manual for more heating capacity data.

Note: Figures are based on 230 Volts.

The 30AHXHJ is specially engineered for applications that require constant cool temperatures year round, and / or rooms with large heat loads such as classrooms and conference rooms.

9 AND 12,000 BTU/HR, 115V, WALL MOUNT HEAT PUMPS

FUNCTION

Stylish, slim and elegant, these popular wall mounted units are designed for single rooms. Indoor units have a clean, aesthetic design and are small but mighty and shorter in length than competing units, helping them blend into any room.

EASY MAINTENANCE

Front panel is easily removed for cleaning.

APPLICATIONS

This category of equipment is ideal for smaller spaces where spot cooling or heating is required. Residential applications including sunrooms and additions are made easier with these 115 volt heat pumps. Do you have a warm or cool spot in your home? Rheem® Mini-Splits can provide extra cooling or heating capacity for those hard to cool areas. Commercially, their small size makes them ideal for small offices, providing individual temperature control.

18, 24, 30, 36,000 BTU/HR WALL MOUNT HEAT PUMPS

¹Available only with optional wired remote control.

²Available only with optional Interface kit.

³AXJ models only.

FUNCTION

Stylish, slim and elegant, these wall mounted ductless heat pumps are designed for single rooms. Ideal for spaces requiring additional capacity but are limited on space. With more efficient zone control, ductless mini-splits are perfect for renovations, restorations, conversions, and add-ons.

OPTIONAL ACCESSORIES

- Wired Remote Control: RXRVNUM
- Wired Remote Control: RXRNUM
- Simple Remote Control: RXRSNUM
- Dry Contact Wire Kit: RXXWZX

LOCK OUT FUNCTION

This feature is set by the contractor on behalf of the Commercial Property Owner to prevent either Cooling or Heating operation from occurring. This is not a function that can be set by a tenant, user, or homeowner.

²AFFHJ models only.

IDEAL RADIATOR REPLACEMENT

At less than 24" high and 30" wide, floor mount models fit easily under a standard window and can replace a radiator twice its size while producing more capacity.

BASE PAN HEATER (AFFHJ MODELS)

AFFJ models can operate down to -5°F. AFFHJ models can operate down to -15°F. See the full Low Temperature Heating Operation story on page 12.

OPTIONAL ACCESSORIES

- Wired Remote Control: RXRVNUM
- Wired Remote Controller: RXRNNUM
- Simple Remote Control: RXRSNUM
- Dry Contact Wire Kit: RXXWZXZ5

TWO FANS AND WIDE AIRFLOW

Having both upper and lower airflow quickly warms or cools the entire room. Floor mount can be set in "Upward Airflow Only" when occupants wish not to have feet warmed or cooled.

9,12,18,000 BTU/HR COMPACT CASSETTE HEAT PUMPS

**Compact Cassette
Grille RXCCGF shown
is sold separately
and must be ordered
with each compact
cassette model.**

¹Available only with optional wireless remote control.

*Requires Rheem's Optional Fresh Air Kit part #RXVXAA. Allows for a 4-inch flex duct connection. Requires a field supplied duct booster fan capable of 60 CFM at .2" W.C. or 90 CFM at .4" W.C. For fan static pressure requirements, see installation manual. Add hood, filter and duct losses for fan total static pressure requirements. Will add 4" to the height of the indoor unit.

³Available only with optional Interface kit. Operation monitoring and On / Off control only.

FUNCTION

Compact cassettes provide comfort cooling or heating for small room applications. Features include high efficiency up to 24.0 SEER, heating at low temperatures down to -5°F, compact design, quiet operation, a standard wired remote control, and the ability to bring in fresh air through the optional Fresh Air Kit.

EASY INSTALLATION

Fits into a standard ceiling tile*.

2-STAGE TURBO FAN

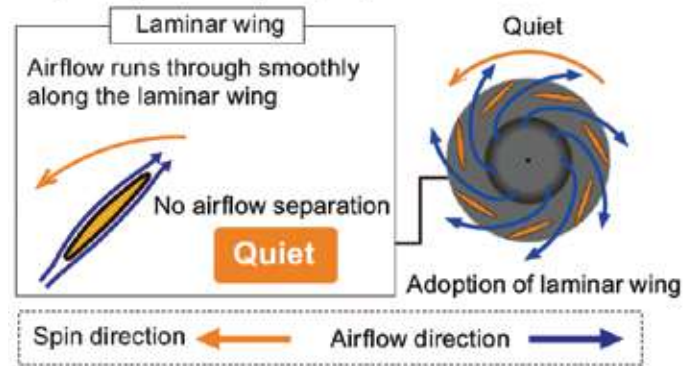

Air distribution is evenly spread across the heat exchanger by the 2-stage turbo fan which produces two separate airflow streams.

QUIET OPERATION

Optimization of wing form (laminar wing design) and number of wings (7 blades) enables as low as 27 dB.

Designed by CFD-analysis (fluid) simulations

OPTIONAL ACCESSORIES

- Wired Remote Control: RXRVNUM
 - Wireless Remote: RXLNHUM
 - Fresh Air Kits: RXVXAA
- Mixes room air which then passes through the heat exchanger.*

9, 12, 18,000 BTU/HR SLIM DUCT HEAT PUMPS

¹Available only with optional wireless remote control.
²Available only with optional Interface kit. Operation monitoring and On / Off control only.

FUNCTION

Slim ducts provide cooling or heating for small room applications such as offices, restaurants, convenience stores, motels, in retrofit and new construction. Long maximum combined piping length of 66' and 49' in height allow for versatile installations. Either horizontal or vertical flexibility and low height enables compact soffit or cabinet installation.

SLIM DUCT

Built-in drain pump allows for installation of slim duct unit in smaller spaces than traditional units.

RETURN AIR-INTAKE CHOICES

FLEXIBLE INSTALLATION

Unit can be placed horizontally or vertically. However, internal drain pump will not operate when the unit is mounted in a vertical configuration.

OPTIONAL ACCESSORIES

- Wired Remote Control: RXRVNUM
- Wireless Remote and Receiver: RXLRHUM
- Auto Louver Grille Kit: RXGXSA-W (for RIDH07/09/12) and RXGXSB-W (for RIDH18)

FIELD SUPPLIED FILTERS USED WITH SLIM DUCT UNITS

Although Slim Duct units come with factory filters, when return ductwork is used field supplied filters are more practical to use. They can be installed at the unit or for more convenient servicing, in filter grilles. See the guidelines to the right to determine filter sizes.

The chart includes CFM, external static pressure capability and a typical filter size for each model. Filters are sized to keep velocities and static pressure loss low. This will ensure sufficient static pressure is available for ductwork, fittings and supply and return grilles.

Alternative filter sizes with equivalent face areas can be used. After deducting filter loss, available static pressure values are shown.

A fiberglass filter is shown in blue to the left. A MERV pleated filter is shown in white.

APPLICATIONS

The universal floor/ceiling mount 18AXJ and 24AXJ are ideal for a house of worship to mount beneath stained glass windows. Lower in height than the pews, they do not disturb the aesthetics of the space. With long piping lengths of 165’ the outdoor units can also be placed remotely out of sight. Another popular application for this model is in hallways where wall space is limited. The 36ASXJ is popular where fresh air intake and high capacity is required like a restaurant or bar. They are also often suspended from threaded rod and used in multiple to condition large warehouse spaces.

FUNCTION

The 18AXJ and the 24AXJ are universal mount. They can mount low on the wall or transverse mount them on the ceiling. The 36ASXJ can only be mounted on the ceiling, can take in fresh air and can throw air farther.

OPTIONAL ACCESSORIES

- Wired Remote Control RXRNBYU*
 - Weekly Timer
 - Full Function Wired Remote
 - Child Lock Capable
- Condensate Pump RXDPB24T
 - OEM design plug and play
 - Rated for 11.8” of vertical lift
 - Available only for System 36ASXJ

*Requires dip switch change on indoor unit.

⁴Available only with optional wired remote control.
⁵Available only with optional Interface kit. Operation monitoring and On/Off control

BETTER AIR DISTRIBUTION USING
360-DEGREE LOUVERS

Circular flow design allows conditioned air to reach every corner of a room.

INDIVIDUAL LOUVER CONTROL

Each louver can be set individually to deliver comfortable air exactly where you want it in any room configuration. To take advantage of this feature use Wired Remote Control (Touch Panel) RXRNRUZ2.

Individual louvers can be programmed separately. Adjust vertical airflow and louver position with RXRNRUZ2 Wired Remote Control.

Airflow fan speed can be customized depending on room layout.

QUIET OPERATION AND 4 FAN SPEED CONTROL

With the new airflow structure, sound levels are drastically reduced. Circular flow cassette models operate at whisper quiet sound levels. Choose from 4 different fan speeds.

24k BTUh model
(Cooling/High)
35dB(A)

*Compatible Remote Controller is as follows:
RXRNRUZ2 / RXRSRY / RXRHRY / RXLBTC

HIGH ENERGY EFFICIENCY

Energy saving performance is achieved by DC twin rotary compressor, DC fan motor and optimal refrigerant cycle control.

18,000 BTUh and 24,000 BTUh models are Energy Star qualified.

RECOMMENDED ACCESSORIES

NOTE: RGLX Large Cassette grilles are sold separately.

NOTE: Wired Remote Control sold separately.

ACXJ Large Cassettes are compatible with RXRNRUZ2 2-wire controls.

OPTIONAL ACCESSORIES (cont'd on bottom of page 39)

Wired Remote Control (Touch Panel)	RXRNRUZ2
Simple Remote Control.....	RXRSRY, RXRHRY

MULTI-ZONE MINI-SPLIT SYSTEMS

ROMH18AFXZJ, ROMH24AFXZJ,
ROMH36AFXZJ, ROMH45AFXZJ

- Operate as few as one indoor unit or all indoor units
- Choose from 4 indoor unit styles - wall mount, slim duct, compact cassette, and floor mount
- Create hundreds of combinations based on indoor type and BTU/HR
- Connect 2 to 5 indoor units, depending on model
- Connect 14,000 to 54,000 BTU/HR
- No branch boxes or separation tubes required
- A Tri-Zone 24,000 BTU Unit
Rheem® offers a 2-ton system that provides 2- or 3-zone flexibility. By using connectable capacity, this system allows up to three 9,000 BTU units.
- Pricing Compared to Competition
Additional outdoor units provides better matched BTU capacity with indoor units. By better matching the outdoor unit to the indoor capacity a better system value is achieved.

MULTI-ZONE LOW TEMPERATURE HEATING

- Connect 2 to 4 indoor units, depending on model
- Connect 14,000 to 39,000 BTU
- Low Temp Heating down to -15°F outdoor temps
- No branch boxes or separation tubes required

YEAR-ROUND, WHOLE HOME OR BUSINESS COMFORT

Ductless systems are one of today's most advanced forms of heating and cooling. Multi-zone outdoor units can operate from 2 to 5 indoor units simultaneously. Rheem® Mini-Split systems are super quiet as well as highly energy efficient.

Shown to the right is outdoor model ROMH36AFXZJ connected to three wall mount indoor units.

MULTI-ZONE SYSTEMS 18,000, 24,000, 36,000, AND 45,000 BTU/HR

Connectable Capacity

This allows connectable indoor units' total capacity to exceed outdoor unit capacity. See Allowable Combination table on page 50.

If all indoor units are cooling or heating at the same time, the system will limit their capacity so that their total matches the outdoor unit's capacity. When a zone meets a desired set temperature it requires less capacity. The unused capacity is then distributed to the remaining indoor units, increasing their capacity.

MIX AND MATCH FLEXIBILITY

The ability to create the **right** combinations, the **right** quantity (up to 5-zones), the **right** style indoor units, and the **right** capacity. It's the **RIGHT** choice for your home or business.

EFFICIENT INSTALLATION EXAMPLE

The load on a 3-bedroom home with a living room and kitchen downstairs and 3 bedrooms upstairs is 39,000 BTUs (21,000 BTU downstairs and 18,000 BTUs upstairs). However, the family isn't upstairs and downstairs at the same time, therefore not all units will be running simultaneously, allowing 100% heating or cooling to occupied spaces. This can be achieved by our ROMH36AFXZJ outdoor unit.

INDIVIDUAL ZONING: PERSONALIZED WHOLE HOME COMFORT

WALL MOUNTED

They mount high on a wall, out of sight and do not require ductwork, increasing energy efficiency.

- Quiet operation
- Easy maintenance
- High delivered efficiency means lower utility bills

SLIM DUCT

Mounted in a ceiling or in a framed enclosure below a ceiling. They use minimal ductwork and remain very energy efficient.

- Concealed and out of sight
- Look of central air with the efficiency of a mini-split
- Less ducts = higher efficiency

COMPACT CASSETTE

Cassettes are extremely discreet, with only the grille showing in the ceiling. They use the latest fan technology to distribute the conditioned air evenly.

- Wired remote control (wireless is optional)
- Powerful turbo fan operation
- Fits into a standard 2' x 2' ceiling grid

FLOOR MOUNTED

Floor mount systems are ideal for residential radiator replacements or any room with limited upper wall space, like a kitchen or sunroom.

- Compact size fits easily under a standard window
- Features twin airflow for improved heat delivery
- Designer wireless remote control

7, 9, 12, 15, 18, 24,000 BTU/HR WALL MOUNT

MULTI-ZONE INDOOR

RIWH07, 09, 12, 15AVFJ

RIWH18, 24AVFJ

¹Auto Changeover is not designed to provide rapid changes between heating and cooling operation or simultaneous heating and cooling. This feature is not recommended for systems with more than one indoor unit unless all indoor units have similar heating and cooling requirements and have similar temperature set points. If all indoor units have similar heating and cooling requirements and have similar temperature set points, auto changeover will work.

²RIWH18,24AVFJ models only.
³RIWH07,09,12,12AVFJ models only.
⁴RIWH07,09,12,12AVFJ models: Available only with optional wired remote control.
⁵Available only with optional wired remote control and optional interface kit.
⁶Available only with optional interface kit.

BUILT IN FILTRATION

LONG-LIFE ION DEODORIZATION FILTER

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic. The filter can be used for approximately 3 years if it is washed with water when dirty to restore its surface action.

APPLE CATECHIN FILTER

Dust, mold spores and micro-organisms are absorbed onto the filter by static electricity and growth is inhibited and deactivated.

7, 9, 12, 18, 24,000 BTU/HR SLIM DUCT

MULTI-ZONE INDOOR

¹Available only with optional wireless remote control.
²Auto Changeover is not designed to provide rapid changes between heating and cooling operation or simultaneous heating and cooling. This feature is not recommended for systems with more than one indoor unit unless all indoor units have similar heating and cooling requirements and have similar temperature set points. If all indoor units have similar heating and cooling requirements and have similar temperature set points, auto changeover will work.
³Availabe only with optional interface kit.

FLEXIBLE INSTALLATION

Horizontal or vertical, though internal drain pump will not operate when the unit is mounted in a vertical configuration.

SLIM DUCT

Adaptable when ceiling cavity is small and there is no slope for drain.

FIELD SUPPLIED FILTERS

Filters are sized to keep velocities and static pressure loss low. This will ensure sufficient static pressure is available for ductwork, fittings and supply and return grilles. Alternative filter sizes with equivalent face areas can be used.

7, 9, 12, 18,000 BTU/HR COMPACT CASSETTES

MULTI-ZONE INDOOR

Compact Cassette Grille RXCCGF shown is sold separately and must be ordered with each compact cassette model.

¹Available only with optional wireless remote control.
²Auto Changeover is not designed to provide rapid changes between heating and cooling operation or simultaneous heating and cooling. This feature is not recommended for systems with more than one indoor unit unless all indoor units have similar heating and cooling requirements and have similar temperature set points. If all indoor units have similar heating and cooling requirements and have similar temperature set points, auto changeover will work.
³Requires Rheem's Optional Fresh Air Kit part #RXVXAA. Allows for a 4-inch flex duct connection. Requires a field supplied duct booster fan capable of 60 CFM at .2" W.C. or 90 CFM at .4" W.C. For fan static pressure requirements, see installation manual. Add hood, filter and duct losses for fan total static pressure requirements. Will add 4" to the height of the indoor unit.
⁴Available only with optional Interface kit. Operation monitoring and On / Off control only.

EASY MAINTENANCE

Maintenance is made simple by removing the ceiling panel next to the grille. Working on the cassette unit from an adjoining ceiling tile keeps disruption and construction costs down.

2-STAGE TURBO FAN

Air distribution is evenly spread across the heat exchanger by the 2-stage turbo fan which produces two separate airflow streams.

FRESH AIR KITS

RXVXAA
Mixes room air then passes through the heat exchanger.

Fig. 2

1. Upon startup, both top and bottom louvers open.
2. Closer to setpoint, only the top louver stays open to help prevent cold drafts from windows.

18, 24, 36, 45,000 BTU/HR MULTI-ZONE OUTDOOR UNITS

Outdoor unit

Contractors can select either an 18, 24, 36 or 45,000 BTU/HR outdoor unit combined with wall mounted, slim duct, compact cassette or floor mount type indoor units. Mix-and-match flexibility of evaporator type and capacity allows you to choose the indoor unit that best fits the application, whether it be hidden or showcased. These systems are ideal for nursing homes, doctor's offices, condominiums, apartments and residences — any place where individual cooling or heating is needed.

DC TWIN ROTARY COMPRESSOR

A high performance, low noise, large capacity DC twin rotary compressor is used.

COMPACT SIZE

The compact size of the outdoor units allows for many installation opportunities.

SERVICE VALVES

ROM18FXZHJ / ROM24FXZHJ

The above units have service valves.

BENEFITS:

- Installation – It allows for a quicker and more productive install.
- Service – Allows for isolation.
- Add Ons – Ease of additional add-ons.

The ROM36FXZHJ does not have this feature.

¹18+18 is the only 2 indoor unit (RIWH, RIDH or RICH) combination and requires K9FZ1818
²See table for allowed combinations within this connectable capacity range.

18, 24, 36,000 BTUh LOW TEMPERATURE HEAT MULTI-ZONE OUTDOOR UNITS

AMBIENT HEATING TEMPERATURE OF -15°F

Other models may go as low as -5°F, however they do not include a base heater and other advancements found in Low Temperature Heat models. See the full story on page 12.

18, 24,000 BTUh

36,000 BTUh

The base of Rheem's Low Temperature Heat outdoor condensing units.

When temperatures reach 36°F, a built-in heater warms the base of the outdoor unit so that condensation doesn't freeze. Without a heater, freezing condensate can cause noise, damage to the fan blade, condenser, and system performance.

Base Drainage Holes
The contoured base design discharges melted water through many holes located at the bottom of the unit.

IMPROVED HEATING CAPACITY

Heating capacity at low outdoor temperatures was improved by adopting a large heat exchanger and a high capacity compressor.

SERVICE VALVES

ROM18FXZHJ / ROM24FXZHJ

The above units have service valves.

BENEFITS:

- Installation – It allows for a quicker and more productive install.
- Service – Allows for isolation.
- Add Ons – Ease of additional add-ons.

The ROM36FXZHJ does not have this feature.

CHOOSE AN OUTDOOR UNIT:

Select either an 18, 24, 36 or 45,000 BTU/h outdoor unit combined with wall mounted, slim duct, compact cassette or floor mount type indoor units. Mix-and-match flexibility of evaporator type and capacity allows you to choose the indoor unit that best fits the application, whether it be hidden or showcased.

“+” represents available circuit for future expansion when connecting this combination.
*The optional kit RXK9FZ1818 is necessary for dual zone system “18+18” with ROMH36AFXZJ only.
^Wall mounted type RIWH18AVFJ cannot be connected in this combination using ROMH36AFXZJ.
Combination allowed with ROMH36FXHJ.
^⓪Actual rated cooling capacity of RIWH15AVFJ is 14,000 BTU/h.

 = Allowed “Connectable Capacity” combinations over 100%

¹If using RXRNBYSU with these models you need to change the dip switch SW-1 to "ON". Refer to Tech Tip #02B.
²Wall mounted RIWH09, 12, and 15RAHWJ / AHJHJ require accessory interface kit #RXTWBXF1 in order to connect these devices to them.

³Wall mounted RIWH07, 09, and 12AVFJ require accessory interface kit #RXXCBXZ2 in order to connect these devices to them.
⁴Only multi-zone models greater than specific serial numbers are compatible with RXRNUM. See Service Bulletin 0031 for serial number compatibility.

⁵Requires RXWIFI.
⁶Wireless Receiver #RXLRHUM is required in order to connect this device.
⁷Requires accessory interface kit #RXXCBXZ2 and plug model #RXWIFI in order to connect these devices to them.
⁸Requires accessory interface kit #RXTWBXF1 and plug model #RXWIFI in order to connect these devices to them.

THINGS TO KNOW WHEN YOU BUY A RHEEM® DUCTLESS MINI-SPLIT SYSTEM

COMPLETE MINI-SPLIT SYSTEM LIMITED WARRANTY

Standard Limited Warranty

- 5-Year Parts, 7-Year Compressor Warranty

Standard Limited Warranty Extension:

- The Standard Limited Warranty covering parts and the compressor will be extended to a period of ten (10) years under specific conditions and online registration is required (RegisterMyUnit.com) For Complete details, contact your local Contractor, or go to Rheem.com for a copy of the product warranty certificate.

THINGS TO KNOW WHEN YOU INSTALL A RHEEM MINI-SPLIT SYSTEM

Warning

Always use a licensed installer or contractor to install this product. Do not try to install the product yourself. Improper installation can result in water or refrigerant leakage, electrical shock, fire or explosion. Use only parts and accessories supplied or specified by Rheem. Ask a licensed contractor to install parts and accessories. Use of unauthorized or improper installation of parts and accessories can result in injury or property damage. Read the owner's operation manual carefully before using this product. The owners operation manual provides important safety instructions and warnings which should be followed closely. For any questions or concerns, please contact Rheem. Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR® criteria. Ask your contractor for details or visit EnergyStar.gov.

Heat Pump Disclaimer

In most climates a heat pump will handle all of your heating needs. However, this system sometimes requires some other additional source of heat to satisfy heating requirements in the coldest environments. All of the Rheem Mini-Split Heat Pumps use inverter technology and as such offer a wider operating range and more heat capacity than a standard heat pump but will not provide adequate heating if improperly sized or operated outside of its operating range. Specifications vary by model; please consult your contractor before choosing a heat pump as your only source of heat. Systems will maintain temperature up to +/-4 degrees relative to set temperature. To increase energy efficiency on multi-type systems, you should turn off the evaporators when heating or cooling is not needed.

CERTIFICATIONS

ISO

Certification means that Rheem has passed a series of independent audits proving it maintains a modern quality control system to consistently provide quality products. These audits assess all a company's systems that affect quality. All Rheem manufacturing facilities have achieved the prestigious ISO 2001 Certification. Rheem was the first HVAC manufacturer in North America to earn this distinction in all its manufacturing facilities

AHRI Energy Guide® Program (U.S.)

To view AHRI numbers or Energy Guide labels, please go to www.ahridirectory.org.

ASTM

Our outdoor units shall withstand 1,000 hours of salt spray tested per procedure ASTM B117.

The new degree of comfort.®
